Ship real apps fast

Our batteries-included platform provides auth, email, connectors, and hosting so you can go from prototype to production in days.

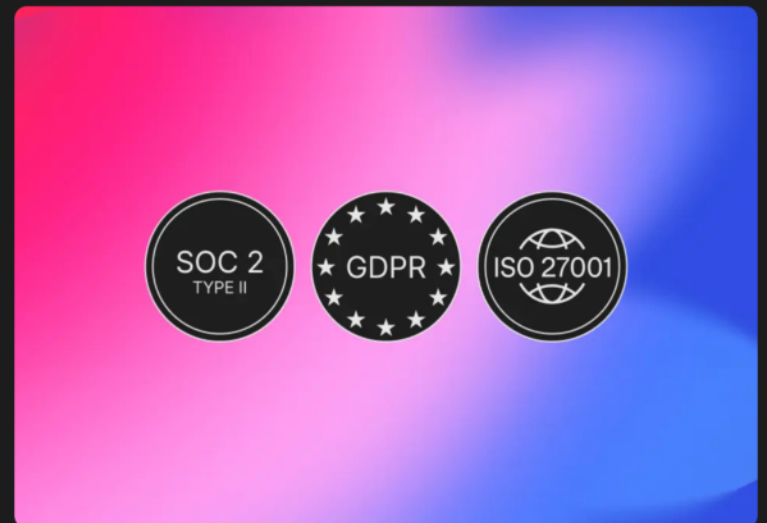

Plays well with your stack

Standard React, Supabase, and Tailwind outputs sync to GitHub. Integrate with your existing APIs and development tools. Deploy anywhere.

Govern at enterprise standards

SOC 2/ISO 27001 certified with SSO/SAML, role-based access, audit logs, and workspace-level brand consistency built in.

Make your team unstoppable.

for Product Managers

- Interactive prototypes that look and feel real, in minutes not weeks
- Connect to real data so demos are credible, not click-through mockups
- GitHub sync, so your team can keep building on top of what you start
- Connect your workflow tools (Notion, Linear, Jira) to accelerate development

[Learn more >](#)

for Designers

- Design mode for creative control over layouts, styles, and themes
- AI image generation to quickly explore concepts and directions
- Consistent design standards with workspace themes across projects
- Production-ready code, not screenshots or static prototypes

[Learn more >](#)

for Engineering

- Real code, not screenshots (React + Supabase, not PNGs)
- Clearer requirements because visual prototypes surface edge cases early
- GitHub sync so you can pull code, review it, and keep building

for Marketers

- Launch on-brand landing pages, internal tools, and experiments quickly
- Keep everything consistent with shared themes and design standards
- Connect forms to your existing tools so leads flow straight into your funnel

SECURITY & GOVERNANCE

Enterprise-grade security

- Control access with role-based permissions
- Enterprise authentication with SSO and SAML
- Your code syncs to your GitHub repository
- Built on a modern stack including: React, Supabase, and Tailwind

Integrations and ecosystem

Don't start from scratch. Connect your internal tools to Lovable and build within your context.

[Explore all integrations >](#)

50+ connectors

For prototypes

Pull context from Jira, Confluence, Notion or Linear to build your prototype and validate with stakeholders before engineering starts.

For internal tools

Connect your CRM, databases, or enterprise systems to build custom dashboards and workflows your teams actually need.

For customer apps

Sync validated prototypes to GitHub and hand off standard React, Supabase, and Tailwind code.

ENTERPRISE PLAN AND SUPPORT

Dedicated support for enterprise customers

- Priority response times to keep your team productive
- Comprehensive onboarding to configure your workspace and get building
- Ongoing training to master Lovable and adopt best practices
- Direct product team access for custom integrations and roadmap input
- Dedicated guidance to deploy and scale AI professionally

Security by the Numbers

Real impact with measurable results

3M+

Security suggestions delivered to users monthly

67%

Reduction in risk & exposure with Security Checker 2.0

10K

Malicious prompts prevented daily

24/7

Security monitoring & audit

Level	Link	Issue
> Error	🔗	Customer Contact Information Could Be Stolen
> Error	🔗	User Email Addresses Publicly Exposed
> Warn	🔗	Auth OTP long expiry
> Warn	🔗	Leaked Password Protection Disabled
> Warn	🔗	User Behavior Data Could Be Tracked by Anyone

Security Checker 2.0

Your site's new body guard with real-time protection and expandable platform capabilities (free).

- ✓ Automatically scans for exposed secrets
- ✓ Real-time notifications for security findings
- ✓ Helps you secure your project from external threads
- ✓ Continuous updates with new scanning modules

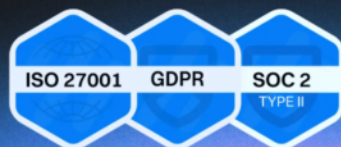

AI-Powered Platform Safety

Stopping threats before they start with custom policy enforcement and intelligent detection.

- ✓ Evaluates against 20+ Lovable-specific policies
- ✓ Blocks a large number of malware, phishing, and impersonation prompts
- ✓ Human-in-the-loop review system
- ✓ Partnership with leading security researchers

Trusted & safe
platform

Industry-Recognized Security

Our security practices meet and exceed industry standards.

- ✓ SOC 2 Type 2 Compliant
- ✓ GDPR Compliant
- ✓ ISO 27001:2022 Certified
- ✓ Continuous security auditing
