# The Home of Machine Learning

Create, discover and collaborate on ML better.

## The collaboration platform

Host and collaborate on unlimited public models, datasets and applications.

## Move faster

With the HF Open source stack.

```
# Use the high-level helper
from transformers import pipeline

pipe = pipeline("text-generation", model='

# Or load the model directly
from transformers import AutoModel

model = AutoModel.from_pretrained("TheBlo

# Use Diffusers for image generation
from diffusers import DiffusionPipeline
```

T1 Sort: Recently

Give your organization the most advanced platform to build AI with enterprise-grade security, access controls, dedicated support and more.

### Single Sign-On

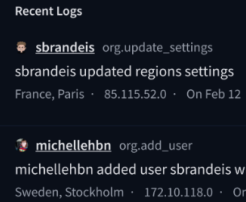

Connect securely to your identity provider with SSO integration.

### Regions

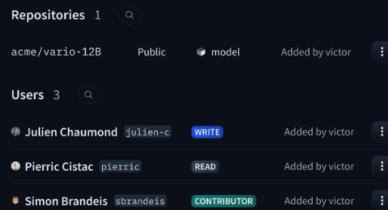

Select, manage, and audit the location of your repository data.

### Audit Logs

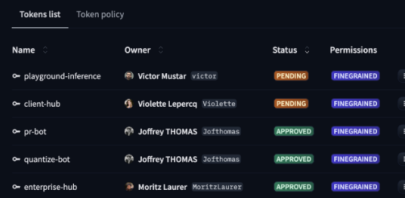

Stay in control with comprehensive logs that report on actions taken.

### Resource Groups

Accurately manage access to repositories with granular access control.

### Token Management

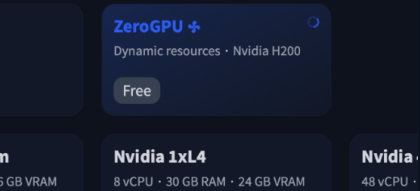

Centralized token control and custom approval policies for organization access.

### Analytics

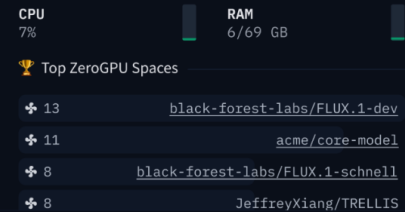

Track and analyze repository usage data in a single dashboard.

### Advanced Compute Options

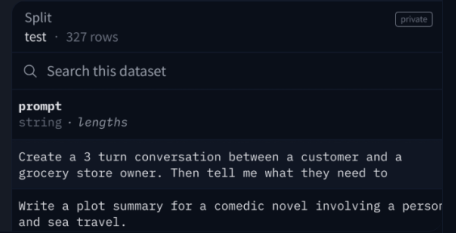

Increase scalability and performance with more compute options like ZeroGPU.

### ZeroGPU Quota Boost

All organization members get 5x more ZeroGPU quota to get the most of Spaces.

### Private Datasets Viewer

Enable the Dataset Viewer on your private datasets for easier collaboration.

# Security & Compliance

Copy page

Inference Endpoints are built with security and secure inference at their core. Below you can find an overview of the security measures we have in place.

## Data Security & Privacy

Hugging Face does not store any customer data in terms of payloads or tokens that are passed to the Inference Endpoint. We are storing logs for 30 days. Every Inference Endpoints uses TLS/SSL to encrypt the data in transit.

We also recommend using AWS Private Link for organizations. This allows you to access your Inference Endpoint through a private connection, without exposing it to the internet.

Hugging Face also offers GDPR data processing agreement through an Enterprise Hub subscription. For more information or to subscribe to Enterprise Hub, please visit <https://huggingface.co/enterprise>.

## Model Security & Privacy

You can set a model repository as private if you do not want to publicly expose it. Hugging Face does not own any model or data you upload to the Hugging Face Hub. Hugging Face also provides malware and pickle scans over the contents of the model repository as with all items in the Hub.

## Inference Endpoints and Hub Security

The Hugging Face Hub and Inference Endpoints are SOC2 Type 2 certified. The Hugging Face Hub also offers Role Based Access Control.

You can read more about security at Hugging Face in general in the following links:

- information on Hugging Face Hub security: <https://huggingface.co/docs/hub/security>.
- information on the Enterprise Hub subscription and its premium security features: <https://huggingface.co/docs/hub/enterprise-hub>
