FOR YOUR PRODUCT

Embed Workato right into your product

Integrations are tough to build and harder to maintain. With Workato's embedded offerings you can now easily bring integrations and workflow automations in your product with minimal to no engineering effort.

- ✓ Connect to thousands of apps
- ✓ Customize Workato to your needs
- ✓ Offer single sign-on from your application
- ✓ Get customer insights from your dashboard
- ✓ Provide customers with featured recipes
- ✓ Access to 24x7 support

Workato uses a flexible, usage-based subscription pricing model rather than fixed list prices.

Organisations pay a base fee for access to the Workato platform and then additional costs based on how much automation they run — typically measured by the number of automated actions ("tasks") and workflows they execute.

Workato also offers different tiers or editions with varying capabilities, and pricing is provided as a custom quote that reflects the customer's scale, usage volume, and any extra features or connectors required.
