

Generation Digital

Figma lets you turn big ideas into real products.
Brainstorm, design, and build with your team.

Figma Design

Design and prototype in one place

Dev Mode

Translate designs into code

FigJam

Collaborate with a digital whiteboard

Figma Slides

Co-create presentations

Figma Draw NEW

Illustrate with advanced vector tools

Figma Buzz BETA

Produce on-brand assets at scale

Figma Sites BETA

Publish fully responsive websites

Figma Make NEW

Prompt to code anything you can imagine

FIGMA ENTERPRISE

Scale design. Reduce complexity.

Figma Enterprise keeps your design systems organized, your teams connected, and your products moving ahead—no matter how much your company grows.

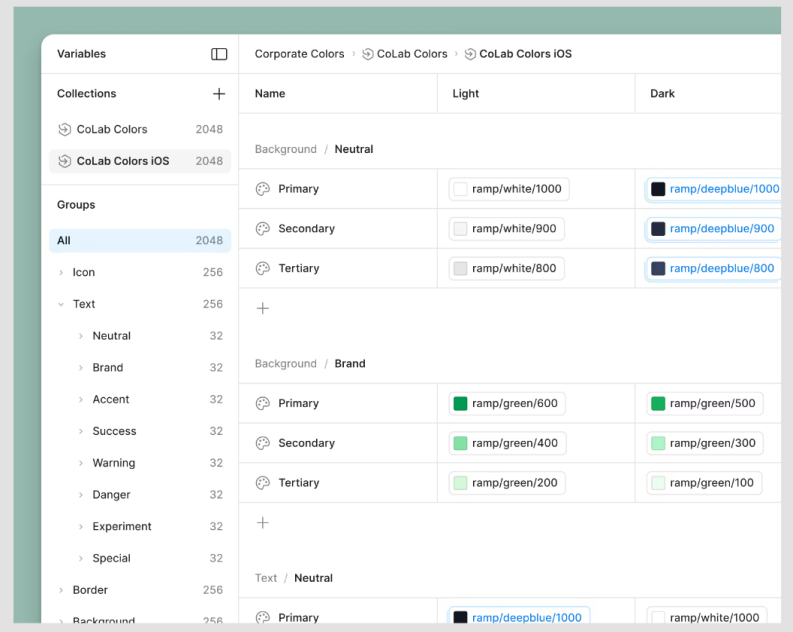

Build high quality products—no matter your org size

Flex your design system across multiple teams, products, and brands.

Bring your brands under one design system

Whether you have one brand or 100, Figma Enterprise helps you keep them organized with libraries and workspaces. Use a single design system for everything? Easily share it across all teams.

Track design systems adoption

Spot trends, see where design styles drift, and monitor how teams use Figma with the library analytics API.

[Learn more](#)

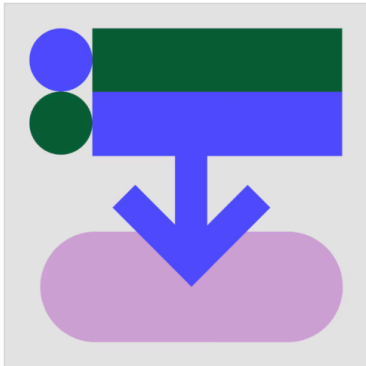

Stay connected as you scale

Use dedicated workspaces to keep projects, files, and assets organized across your org. With Enterprise, create default teams and apply consistent sharing settings so access is clear.

Security designed for peace of mind

Figma Enterprise comes with the rigorous security and compliance features baked into Figma, plus advanced admin controls and data protection.

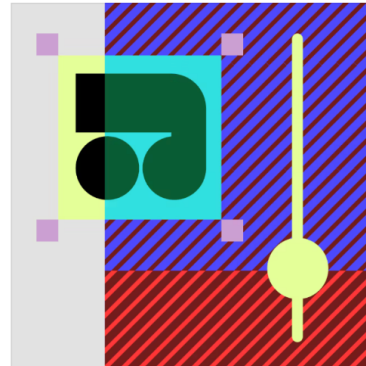

Share files safely

Password-protected links, guest access controls, and SCIM protocol let the right people into your files at the right time.

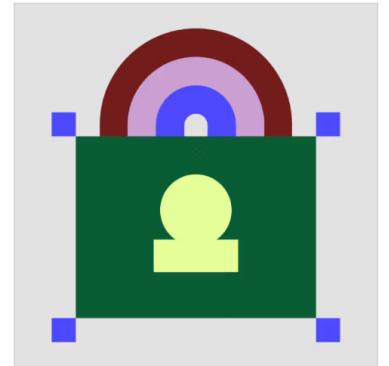

Monitor user activity

Add the REST API to view actions like file edits, page creation, user access and other activity logs.

Stay compliant

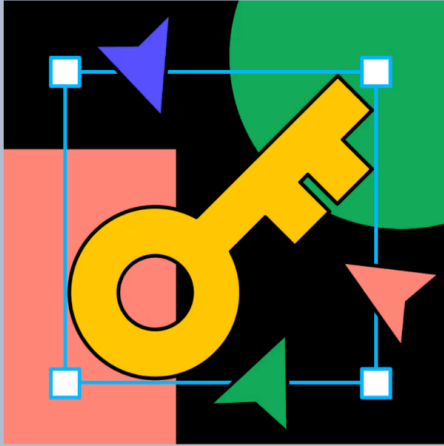

Enable network access, set session timeouts, and turn on EU data hosting to keep compliant wherever you work.

Governance+ add-on

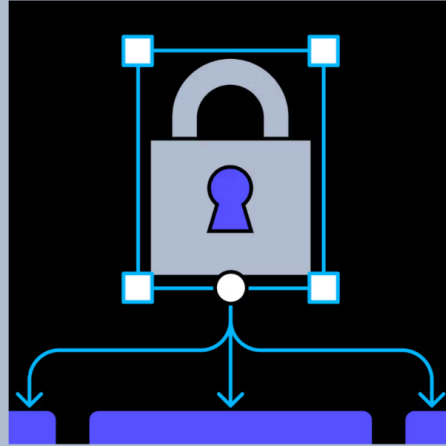

For maximum protection, the Governance+ add-on offers centralized controls like IP allowlisting, network restrictions, enforced 2FA, and more.

Protect government data with the most secure version of Figma

Government-standard security

Collaborate securely on a FIPS 140-2 validated, isolated environment built for and by the public sector community.

Security access and onboarding

Deploy Figma organization-wide with confidence via SAML SSO, SCIM provisioning, 2FA, domain capture, and network access controls.

Granular controls, greater visibility

Fine-tune settings to meet org-wide and group-specific needs and get insights into activity happening across your organization.
