Create

Tailored to your needs and scale

Vanta's powerful tools will help you scale a security and compliance platform tailored to your unique program.

Vanta API

Integrate Vanta with your apps and workflows to automatically manage processes, export data into external reports, and initiate external workflows.

Customization

Build a security program to match your unique requirements and goals by customizing your compliance frameworks, controls, policies, risk management, and more.

[Request a demo →](#)

Admin tools for complete control

Vanta's admin tools put you in control and empower each member of your team to do their best work.

Reporting

Keep your teams and stakeholders aligned with a unified view of program data—across program risk, vendor risk, compliance, personnel, security questionnaires, and more.

Roles and permissions

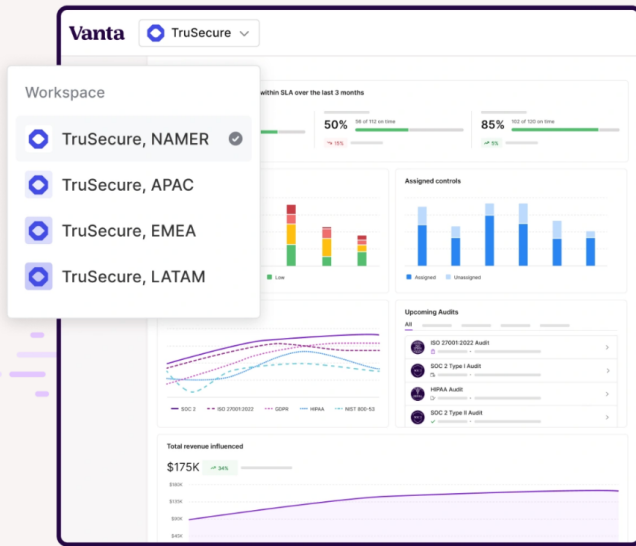

Give each team member just the right level of access to successfully run your security and compliance program by utilizing Vanta's default suite of permissions or customizing your own.

Workspaces

Manage the security and compliance programs of multiple business units or products within a single organization.

Centralized collaboration

Track shared progress, follow up with task owners, and keep stakeholders in the loop—all within Vanta.

Enterprise-grade security and controls

Learn more about our security and controls on [Vanta's Trust Center](#).

Event logs

View history of all changes made within Vanta, including administrative activities, data modification, and user logins.

Data encryption at rest

Data is encrypted before it ever hits your database to better protect your most sensitive information.

Encryption keys

Application secrets are encrypted and stored securely through AWS Key Management System (KMS).

SCIM

Leverage SCIM for a secure, automated way to provision, manage, and deprovision users in Vanta.

IdP support

Authenticate and grant permissions in Vanta through Office 365, Okta, Google Workspace, OneLogin, JumpCloud, and more.

Responsible AI

Vanta puts you in control with an informed consent model, and never trains AI models using customer data.
