

# Generation Digital

## AI-driven Human Risk Management and Security Awareness Training – 40% Cost Savings on other providers.

Our AI-driven tools automate your entire security awareness strategy, from cyber training, policy management and simulated phishing tests to robust automated reports  
- We reduce risk FAST.

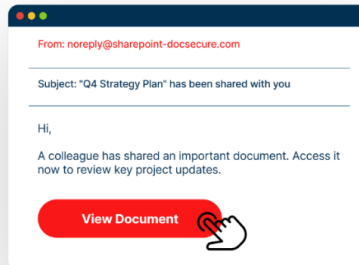

# Deliver Security Training for Organisations of All Sizes, in Any Industry, and Any Language

## SMBs

New to security awareness training? Whether you're getting started or working toward cyber insurance, ISO, or Cyber Essentials compliance, Phishing Tackle makes it easy to reduce user risk - FAST.

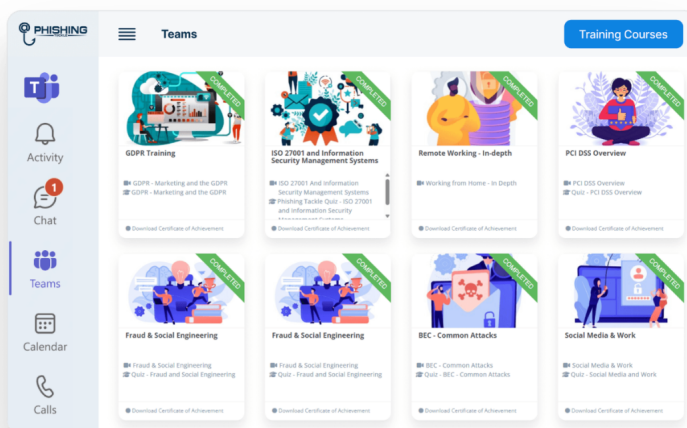

## Enterprise

Phishing Tackle lets global organisations quickly and cost-effectively roll out Human Risk Management, managing all business units seamlessly from one central dashboard.

## MSP

Manage your client's security effortlessly with full billing integration, a centralised view of your entire estate, and the ability to clone campaigns - saving time while strengthening defences.

## PhishTAIL

## Integrated Security Awareness Training within Microsoft Teams

PhishTAIL brings your training, notifications, and policies directly into a familiar workspace, making it easier for users to engage without switching apps. This seamless integration increases uptake and keeps security top of mind.

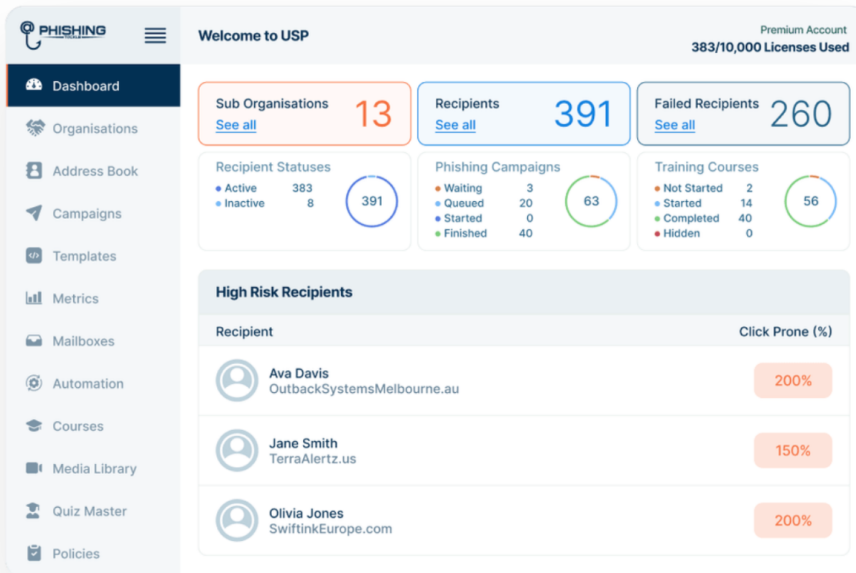

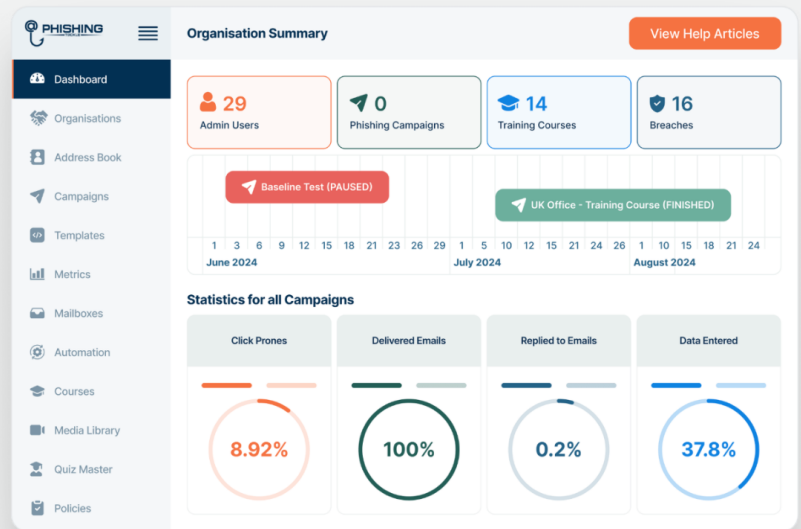

- ✓ Deliver training and alerts quickly in one place to boost user engagement
- ✓ Remove login barriers to speed up training completion
- ✓ Give users clear visibility of outstanding training tasks to stay on track

## Human Risk Management

# Understand Human Risk with Real-Time Phishing Analytics

Track employee phishing susceptibility with clear dashboards, intuitive reporting, and real-time risk insights - so you know exactly where to focus training.

- ✓ View your Click-Prone % to see how many employees fall for phishing attempts.
- ✓ Identify high-risk employees who need immediate training.
- ✓ Access key phishing statistics to track security awareness progress.

## Unified Security Platform

# One Platform to Track and Manage Phishing Risk at Scale

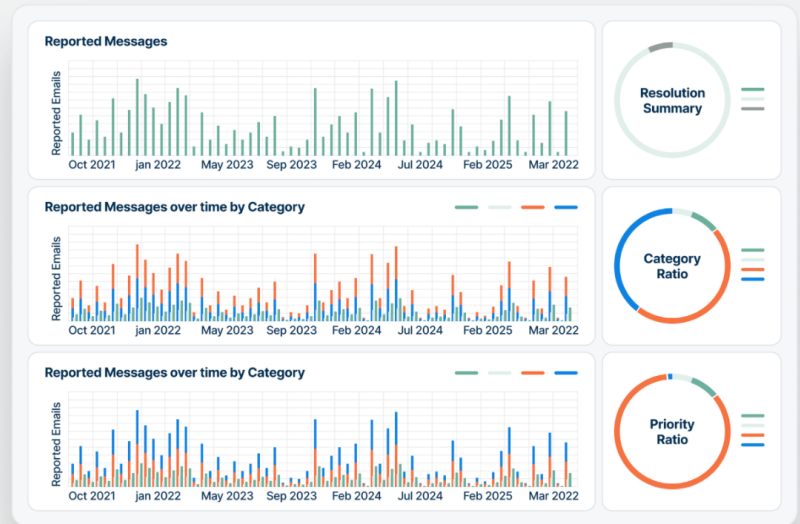

Whether managing multiple business units or serving clients as an MSP, Phishing Tackle gives you a centralised view of security performance, ensuring a streamlined strategy with integrated reporting.

- ✓ All your campaign statistics in one dashboard
- ✓ Multi-lingual support for global teams and diverse workforces
- ✓ Centrally manage and clone campaigns with ease

PhishNet

## Automate Phishing Threat Detection and Response

PhishNet uses S.O.A.R. (Security Orchestration, Automation, and Response) technology to instantly identify, analyse, and respond to security threats, so your team can focus on higher-priority tasks instead of manual monitoring and analysing reported emails by your users.

USE AI TO GENERATE SIMILAR DOMAIN NAMES

| Monitoring                          | AI Generated Domain | Domain             | Description                        | Risk: Score % |
|-------------------------------------|---------------------|--------------------|------------------------------------|---------------|
| <input checked="" type="checkbox"/> | ✦✦                  | phishingtack1e.com | Using the digit "1" instead of "i" | 17%           |
| <input checked="" type="checkbox"/> | ✦✦                  | phishingtacke.com  | missing the "i" at the end         | 17%           |
| <input checked="" type="checkbox"/> | ✦✦                  | phishingtacklè.com | Using "è" instead of "e"           | 18%           |
| <input checked="" type="checkbox"/> | ✦✦                  | phishingtackle.com | Using "à" instead of "a"           | 18%           |
| <input checked="" type="checkbox"/> | ✦✦                  | phishingtackle.com | using "i" instead of "i"           | 18%           |

CatPhish

## Detect and Block Fraudulent Domains Before They're Used in Attacks

Domain Spoofing remains one of the biggest threats to a busy workforce. CatPhish uses AI-powered domain monitoring to track lookalike domains in real time, helping you prevent phishing scams and brand impersonation before they cause harm.
