

sumo logic

Generation Digital

WHY SUMO LOGIC

Meet the world's most powerful and scalable log analytics platform

01

One integrated log analytics platform

A single source of truth for development, security and operations teams.

02

Cloud-native, distributed architecture

Scalable, multi-tenant platform purpose-built for structured and unstructured logs – never drop your data.

03

\$0 ingest and credit licensing

Flex Licensing decouples log ingest from budgets, eliminating data gaps during troubleshooting.

04

Machine learning and advanced analytics

Identify, investigate, and resolve issues faster and more accurately with AI/ML, including natural language search with Dojo AI.

05

Secure by design

Multi-million annual investments on regulatory compliance certifications, attestations, pen testing, code reviews and bug bounty programs.

06

Faster incident response

Add context to security alerts with threat intelligence data and respond to issues faster with customizable, automated playbooks.

HOW IT WORKS

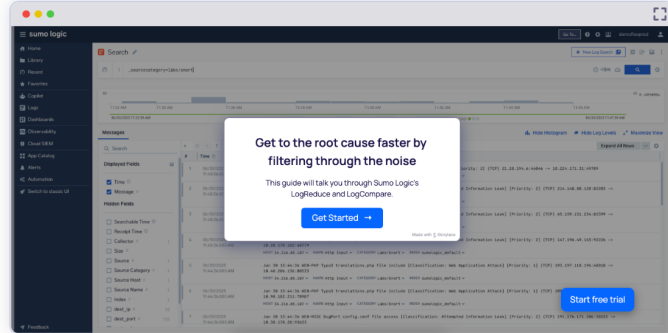

Sumo Logic Intelligent Operations Platform

SOLUTIONS

Transform complexity into insights

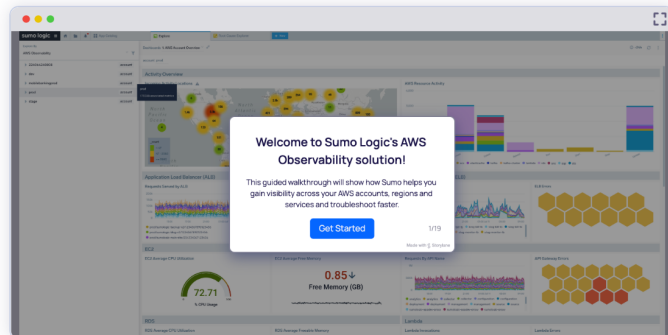

Log Analytics	^
AI-powered troubleshooting and out-of-the-box dashboards

Cloud SIEM

Act on threats faster

01

Start free trial

Get up and running in minutes. No credit card required.

- ✓ 30-day full feature trial
- ✓ No credit card required
- ✓ Deploy in minutes

02

Integrate your data

Easily collect structured and unstructured logs with 100s of OOTB integrations.

- ✓ Integrate with SaaS vendors
- ✓ Kubernetes, AWS, logs and metrics
- ✓ Full OpenTelemetry collections

03

See it in action

Prebuilt, customizable queries, dashboards, monitors and alerts.

- ✓ Explore data
- ✓ Create your dashboards
- ✓ Create monitoring and alerts

Security is in our DNA

Sumo Logic security applies best-in-class technologies and a rigorous process to put the safety of your data first.

**World-class security organization**

Founded by IT Security veterans with 100+ years of experience. CSO and a dedicated SOC team focused on ensuring platform and data security.

**Best-in class DevSecOps**

Robust platform by integrating security principles into development process from the get go.

**Security-by-design platform**

Shared responsibility model where we provide third party certifications validating our InfoSec policies and practices, along with customer controls so that you can directly manage your use case needs.

Compliance certifications

Compliance attestations and certifications speak to our commitment to data security. Sumo Logic holds the following for our SaaS Log Analytics Platform and Cloud SIEM.

FedRAMP® Moderate Authorized
