G-CLOUD 15 – Service Definition Document

Synthetic Experimentation & Training Development

Dear Buyer,

Nova Aerospace Ltd (t/a Nova Systems) is delighted to offer the following services to all buyers on the G-Cloud 15 framework.

Nova Systems has a strong track record in successfully supporting its customers in major procurements and as a result provides an excellent support service to any major complex procurement activity. Nova Systems have provided advice and support to numerous Government and Commercial clients undertaking multi-million-pound complex procurements, including both technologically advanced systems and service-based requirements.

Nova Systems is able to deliver this by providing the following key service features:

Service features

- Synthetic experimentation & Synthetic architecture development
- Federated and networked simulation
- Test & Evaluation
- Project Management/P3M
- Technical Assessment
- COEIA Development
- Data Analytics
- Wargaming
- Concept Development & Force Development
- OA/Decision Support

Service benefits

- Greater confidence in project and programme delivery – ensuring outcomes are achieved.
- Significant reduction in overall project risk – minimizing uncertainty.
- Clear, demonstrable improvements in performance, cost efficiency, and delivery timelines.
- Proactive exploitation of emerging opportunities – unlocking additional benefits and competitive advantage.
- Customer situational awareness – empowering informed, timely decision-making.
- Strategic alignment – ensuring initiatives consistently support organisational objectives.
- Informed stakeholders – fostering collaboration, trust, and shared ownership of outcomes.

Kind Regards,

David Cooper
