ANY COMMUNITY TO
VERINT COMMUNITY
MIGRATION SERVICE

Pricing

1. PRICING

This document sets out pricing for migrating any other vendor community to Verint Community Migration Services offered under the Crown Commercial Service (CCS) G-Cloud 15 Framework. Prices are fixed, transparent, and exclusive of VAT.

Number of posts to be migrated	Price (ex VAT)
Up to 10,000 posts	£30,000
10,001 to 50,000 posts	£60,000
50,001 to 250,000 posts	£90,000
250,001 to 1,000,000 posts	£120,000

Pricing is based on the total number of posts migrated from the source platform. Migration volumes above 1,000,000 posts or outside the defined scope may require additional cloud support services charged at the published support rate. Verint Community platform licensing is purchased separately under the Cloud Software lot.

Migration will include content, structure, metadata, and functionality supported by the source platform's export mechanisms and the import capabilities of Verint Community, including features available via supported APIs.

This service is delivered remotely as a time-limited cloud support service. No availability SLAs apply.
