Service Pricing Options

The Splunk Health Check & Assessment Service is available in the following size-based options. Each option represents a fixed-scope engagement with a defined price range, selected based on the scale and complexity of the customer's Splunk environment.

Service Size	Typical Scope	Price Maximum (excl VAT)
Small (Light Review)	Single Splunk instance or limited deployment. Primarily configuration, ingestion settings, and basic performance and health checks.	**£5,000**
Medium - (Standard Health Check)	Typical production Splunk deployment including indexing, search performance, ingestion patterns, licensing efficiency, and operational configuration.	**£8,000**
Large (Complex / Regulated Environment)	Larger or more complex estates such as multi-environment deployments, regulated environments, higher data volumes, or complex ingestion and search patterns.	**£12,000**

The applicable pricing band is agreed at order stage based on the customer's environment size and complexity

Service Outputs

Each engagement includes a written Splunk health check report detailing findings and prioritised recommendations.
