Price List

Service Pricing Options

The Network Health Check & Assessment Service is available in the following size-based options. Each option represents a fixed-scope engagement with a defined price range, selected based on the scale and complexity of the customer's network environment.

Service Size	Typical Scope	Price Maximum (excl VAT)
Small (Light Review)	Single site or small network environment. Review of core network components, configuration, and basic performance and resilience considerations.	£5,000
Medium - (Standard Health Check)	Typical organisational network covering multiple components such as LAN, WAN, cloud connectivity, and security controls. Includes configuration, performance, resilience, and operational review	£7,000
Large (Complex / Regulated Environment)	Larger or more complex environments such as multi-site networks, hybrid or cloud-connected estates, or higher operational and security complexity.	£9,000

The applicable pricing band is agreed at order stage based on the customer's environment size and complexity.

Service Outputs

Each engagement includes a written network health check report detailing findings and prioritised recommendations.
