Intelligence Modules (Part B)

License Metric	Unit Description	Maximum Unit Price (£)	Billing Frequency
Triage Intelligence Module	Adds contextual intelligence fields aligned to the Triage module for rapid IP assessment	£72,000.00	Annual
Investigate Intelligence Module	Adds deeper investigative context and enrichment fields aligned to the Investigate module	£120,000.00	Annual
Hunt Intelligence Module	Provides advanced threat hunting context and intelligence fields aligned to the Hunt module	£240,000.00	Annual

Pricing Model

GreyNoise is licensed on a subscription basis, charged annually in advance for the agreed contract term. Pricing is determined by the selected platform licence tier and any optional intelligence modules. The prices listed below represent maximum charges under this framework agreement.

Optional Intelligence Modules

License Metric	Unit Description	Maximum Unit Price (£)	Billing Frequency
Vulnerability Prioritisation Intelligence Module	Provides access to intelligence fields that support vulnerability prioritisation and risk-based decision making	£48,000.00	Annual
Business Services Intelligence Module	Provides access to intelligence fields related to business services exposure and identification	£120,000.00	Annual

Contract Duration

Minimum contract term is 12 months. Pricing is fixed for the duration of the agreed contract term.

Onboarding and Setup

Access to the GreyNoise platform is provided following contract award and licence activation. There are no mandatory onboarding or setup fees included in the software licence. Optional onboarding, training, or professional services are available separately if required.

Assumptions and Exclusions

Pricing covers software licensing only. Professional services, managed services, or bespoke development are not included. Prices listed are maximum charges under the G-Cloud 15 framework. VAT is charged at the prevailing rate.
