About Larmer Brown

Larmer Brown is a digital learning consultancy with over 20 years' experience, and the Larmer LRS is one of several digital learning and support tools in our portfolio.

The Larmer LRS is powered by Veracity Learning and is licensed to Larmer Brown by Veracity Technology Consultants, LLC.

The Larmer LRS (Learning Record Store) is a software platform for recording and reporting on a user's learning experience and performance data using the Experience API (xAPI) specification.

The core capabilities of this platform are:

- A Learning Record Store
- A Learning Analytics Platform
- A Learning Portal

This workshop will teach you how to utilise Larmer LRS effectively and efficiently by setting up appropriate administration rights, tracking and reporting on the required data sets and viewing default dashboards as well as creating customised dashboards with the widget builder.

Workshop Overview

This workshop comprises of 4 sessions that range from 1 to 2.5 hours in duration. During a pre-call we will seek to understand your specific learning and analytics requirements and customise the workshop modules for your delegates.

To gain the full value from this workshop, delegates are asked to complete the Larmer LRS eLearning course as a pre-requisite to attending the workshop.

Workshop Modules

Session 1: Introduction to xAPI and overview of LRS

Session 2: LRS Administrator set up and management

Session 3: Understanding the xAPI Statements

Session 4: Custom dashboards and analytics
