Pricing Information

The majority of Graphnet's solutions use a territories' population count to govern solution pricing. In some instances the number of patients on a provider organisations Master Patient Index (MPI) may be used to govern which band is used. The submitted pricing is year 1 pricing. Year 2 pricing will increase by 4% or by indexation. Year 3 pricing will increase year 2 pricing by indexation or 4%.

Please note that Graphnet have included our standard implementation charges within the Pricing Document for transparency and indicative budgeting. However, due to the very specific and individual nature of each project and the fact that every customer's requirements, environment, and delivery approach can differ these standard charges should be treated as a baseline only. A full and accurate implementation cost will be confirmed following detailed scoping and agreement of the final project requirements, as it is not possible to apply a single fixed fee to these critically important services.

3rd party costs for feeds / SSO's etc. are not included. Prices exclude VAT.
