

# Appspace Digital Signage

## Service Definition

## Overview

Publish your company messages and critical content to workplace displays across offices, buildings, campuses, or the entire organisation. Our extensive list of partners like Cisco, Crestron, Poly, Google, and more means you can start using Appspace for your digital signage easily.

Appspace is platform agnostic which means it runs on almost any device, giving you the power of choice to use the hardware that's right for your business and your budget.

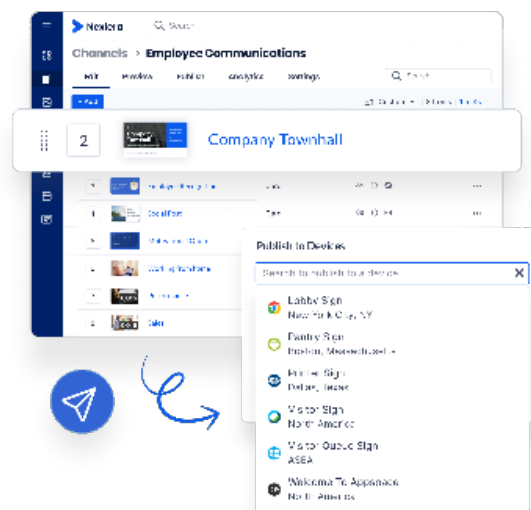

We also help you craft content and messaging with easy-to-use templates, content feeds, industry content that can be published as channels and displayed on

digital signage screens powered by the Appspace App. You can also monitor what's playing on any of these devices anywhere at any time using the device preview functionality in the console.

By using a compatible device, you will be able to install and run the Appspace App on it to play published channels. The list of compatible devices includes Chrome boxes, Android devices, BrightSign devices, LG TVs, and much more.

## Workplace Digital Solutions

Use our workplace digital signage solutions to share critical information.

Share the latest announcements and workplace guidance on digital signage in lobbies, team areas, hallways, and meeting spaces. Naitvely compatible with computers, phones, and in other apps like SharePoint, Teams, or Slack, making it easy to share information beyond your digital signage.

## Card Templates

Ensure communications are always on-brand

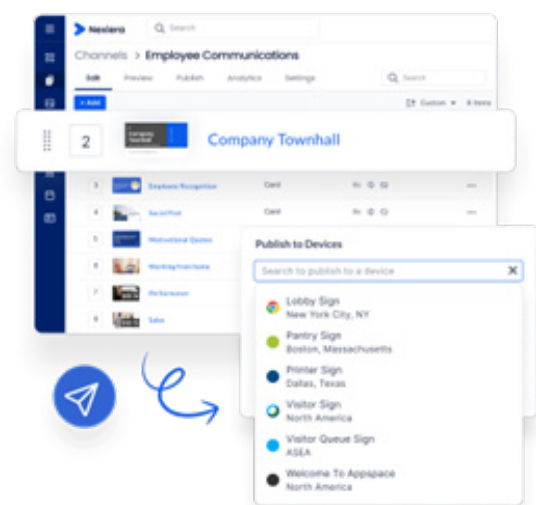

Our library of pre-designed HTML templates makes it easy to share any information. Templates keep all departmental announcements on brand and ensure perfect formatting on displays of any size and orientation.

Card templates also natively work on computers, phones, and in other apps like SharePoint, Teams or Slack making it easy to share information beyond your digital signage.

## Channels

A simple way to organise your communications

Pre-designed channel templates are a fast and flexible way to group and publish information to a single digital sign, groups of signs, or every sign company-wide.

## Built to Scale

**Works on any device and is built to scale**

Whether you have one display of thousands across the globe, our extensive publishing controls provide the power to get your message to the right place at the right time.

## Video Wall

**Supersize your digital science for greater visibility**

Use multiple displays and give your employee and visitor communications that extra wow factor in high traffic areas.

## Collaboration Displays

**Get more value from your collaboration technology**

Extend communications to conference rooms and meeting spaces when they aren't being used for presentations or video calls.

## Enterprise TV

**Simplify how you access live and recorded video**

Keep everyone in the loop by delivering town-halls, all-hands meetings, virtual events training, broadcast TV and more.
