About MakeCloud

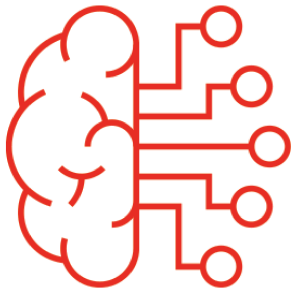

MakeCloud is a DevOps and cloud consultancy based in Harpenden, UK.

Although we are vendor-agnostic, we are proud of our partnerships. We are an AWS Partner, a Google Cloud Partner and a Datadog Implementation Partner.

Our team of professional cloud architects, engineers, and security professionals have years of experience across a wide range of technologies and industry verticals. There isn't much we haven't seen before, so we're likely to have already a battle-tested solution ready to go – no matter your challenge.

Our Approach

Pragmatic

We focus on the business value of our solutions, whether increasing agility, reducing costs, or improving security. We are not tied to any particular vendor or technology, so we can deliver efficient, effective technical solutions with tangible benefits.

Strategic

We are mindful that our DevOps and cloud solutions must fit into the bigger picture of your organisation's overall technical strategy and objectives. If you'd like help defining those objectives, we can help there, too.

Secure

We put security first, always. When delivering a solution, we don't take shortcuts that compromise the security of your cloud infrastructure, applications or data. We're passionate about building security into every level of your application architecture.

Service Description:

Google Cloud Landing Zone

MakeCloud delivers a secure and compliant Google Cloud Landing Zone, enabling organisations to adopt Google Cloud with confidence. We design and implement a best-practice cloud foundation aligned with Google Cloud architecture standards and UK public sector requirements.

Our Landing Zone provides a well-governed environment from day one, incorporating identity and access management, network segmentation, security controls, logging, and cost governance. This ensures your Google Cloud platform is secure, resilient, auditable, and ready to support live production workloads at scale.

MakeCloud's services are available remotely or on-site.

Google Cloud
Partner

Key Service Features

- Automated Google Cloud Landing Zone setup following GCP best practices
- Landing Zone architecture aligned with Google Cloud security standards
- Multi-account structure separates development, testing, and production workloads
- Pre-configured IAM, audit logging, and networking aligned with best practices
- Infrastructure-as-Code ensures consistent, repeatable, and reliable deployments
- Identity & Access Management enforces granular, least-privilege access
- Secure networking: VPC setup with firewalls and logging enabled
- Automation & scalability with Terraform and Infrastructure-as-Code expansion
- An embedded governance framework ensures cloud compliance and security controls

Key Service Benefits

- Accelerated Google Cloud adoption reduces organisational time to market
- Enhanced cloud security safeguards critical data and business operations
- Automated infrastructure improves operational efficiency and system reliability
- Scalable cloud architecture supports growth and future business demands
- Streamlined governance ensures compliance with industry regulations efficiently
- Increased agility enables rapid response to market opportunities
- Reduced complexity simplifies cloud adoption, migration, and management processes

Pricing Structure

MakeCloud's pricing for all G-Cloud 15 services will be structured on a time and materials charging model and will be based on the applicable SFIA (Skills for the Information Age) rate card, which is available as a separate document published on G-Cloud 15, Digital Marketplace.

MakeCloud will work with you to ensure the level of support and team structure that will most benefit your company's needs and provide the greatest value in achieving your DevOps and Cloud objectives.

Security Procedures

MakeCloud takes security and compliance very seriously. We adhere to industry-leading best practice frameworks to help ensure environments are safe, secure, and scalable to meet business needs.

Our security procedures include:

- Staff screening for consultants and engineers.
- MakeCloud will obtain Government security clearance up to SC level for required projects.
- Secure working environment for all projects.
- Data will be handled according to GDPR standards.

On-boarding & Off-boarding

During the onboarding stage, a MakeCloud Consultant will be assigned and provide consistent updates throughout the process to maintain clear communication, ensure project deliverables are met, and drive future development.

A MakeCloud Technical Lead will evaluate the current environment and assess areas for optimisation. Where required, MakeCloud will collaborate with existing engineering teams to ensure relevant knowledge is transferred to aid development and /or appoint a MakeCloud engineer to carry out the required services.

Our off-boarding process will include full knowledge transfer and operational best practice advice. MakeCloud will provide a full handover with all relevant IP and technical information transferred. The MakeCloud team will remain available to support future development and projects.

Tiered Service Levels

- Level 1: Technical Lead
- Level 2: Consultant
- Level 3: Director

Why Choose MakeCloud?

MakeCloud is a team of cloud architects, engineers, and security professionals with years of experience in a wide range of technologies and industry verticals.

At MakeCloud, our mission is to help customers make DevOps & cloud their strategic advantage, resulting in greater efficiency, product quality and competitiveness.

- Vendor-certified engineers across a variety of applications
- Collaborative, pragmatic and business-focused consultants
- Vendor-agnostic
- Security and compliance come first, always.

Our DevOps and cloud engineers have years of experience with a wide range of technologies and application stacks. Our pragmatic approach means we can deliver real value quickly, no matter where you are on your DevOps or cloud journey.
