

AI Quality Assurance & Testing Services

Adopt AI with Confidence

Overview

CQE provides a comprehensive portfolio of Quality Assurance (QA) and testing services specifically designed for AI systems. Our services enable organisations to deploy AI responsibly, securely, and at scale while meeting regulatory, ethical, and performance expectations.

Core Services

- AI Model Validation – Independent validation of AI accuracy, robustness, and explainability.
- Data Quality & Integrity Testing – Ensuring training and operational data is reliable and representative.
- Bias & Ethical Risk Assessment – Identifying and mitigating unfair or discriminatory outcomes.
- Regulatory Compliance Testing – Alignment with GDPR and emerging AI regulation.
- Performance & Scalability Testing – Validation under real-world loads and growth scenarios.
- Security & Privacy Assurance – Protection against data exposure and adversarial threats.

Key Benefits

- Reduced deployment risk
- Increased stakeholder trust
- Faster time to market
- Improved decision accuracy
- Ethical and responsible AI adoption
- Production-ready, scalable AI systems

Why CQE

CQE delivers independent, specialist AI assurance with proven experience in regulated and high-assurance environments. Our flexible engagement models support organisations at every stage of the AI lifecycle.
