Enterprise Systems Readiness & Digital Planning

Holistic cloud support services to assess organisational, technical and operational readiness for the implementation or modernisation of cloud-hosted enterprise applications. The service takes a strategic, whole-system view across corporate functions to identify readiness gaps, risks and priorities.

Features

- ✓ Enterprise systems readiness and maturity assessment
- ✓ Business process and operating model review
- ✓ Cloud technical readiness and dependency assessment
- ✓ Implementation risk and gap analysis
- ✓ Digital roadmap and investment planning

Included

- ✓ Software configuration
- ✓ licensing hosting or operational delivery

Benefits

- ✓ Identifies risks before enterprise system implementation
- ✓ Improves confidence in cloud investment decisions
- ✓ Aligns digital readiness to organisational priorities
- ✓ Reduces delays caused by unmet prerequisites
- ✓ Supports informed options appraisal and sequencing
- ✓ Provides evidence-based readiness assessments

Not included

- ✓ Advisory readiness assessment
- ✓ Findings report and implementation roadmap
