Cloud Readiness Assessment Services

Overarching process that encompasses organisational readiness, application discovery and application assessments. The primary goal of a cloud readiness assessment is to provide you with a gap-analysis of your organisation and a list of applications that can be moved to the cloud smoothly, following a prescriptive cloud application assessment process.

Features

- Assessment of all key functional areas comparing as-is with to-be.
- Recommendations for next steps.
- Business case and TCO/ROI.
- Development of target operating model (TOM).
- Recommendations to support development of a Cloud-first strategy.
- Vendor independent analysis.
- Tried and proven readiness assessment methodology.

Benefits

- Identify key areas where Cloud can provide significant benefits.
- Support decisions to re-platform, retire, retain, repurchase, re-host, or re-factor.
- Outcome-focussed workflow.
- High value output enabling organisations to cloud transform.
- Assurance from industry experts.
