

## **Pricing**

G-Cloud 15 (RM1557.15) Covoxa

Enterprise Resource Planning (ERP)  
Cloud Software Implementation and  
Support Services and ERP Cloud  
Software Strategy, Advisory and  
Consultancy

January 2026

## 1 Introduction

This Pricing Document sets out the maximum framework day rates for the following Covoxa Cloud Support services under the G-Cloud 15 Framework:

- ERP Cloud Software Implementation and Support Services
- ERP Cloud Software Strategy, Advisory and Consultancy

The prices listed in this document represent the highest charges that may be applied under the Framework and cover all consultancy-based activities required to deliver the services. All prices listed are exclusive of VAT and are fully consistent with the pricing submitted through the Digital Marketplace. Discounts may be applied at Call-Off, provided they do not exceed the maximum framework prices published in this document. Where applicable, annual indexation or inflationary uplifts may be applied, as agreed with buyers at Call-Off.

This document is intended to give buyers full visibility of Covoxa's commercial structure, including day rates, optional services and any associated charging assumptions.

## 2 Service overview

Our ERP Cloud Software Implementation, Support Services, Strategy, Advisory and Consultancy services help buyers to implement new ERP solutions and improve existing deployments to maximise value and accuracy. The main solutions both listings provide includes:

| ERP Cloud Software Implementation and Support                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | ERP Cloud Software Strategy, Advisory and Consultancy                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| <ul style="list-style-type: none"> <li>• Design and configuration based on an adopt-not-adapt principle</li> <li>• Enhancements to existing deployments based on vendor release as well as new functionality development based on changing business needs</li> <li>• Data migration using iterative cycles to build confidence and accuracy</li> <li>• Integration development for secure interoperability with existing systems</li> <li>• Testing from unit to end-to-end and user acceptance stages</li> <li>• Deployment and cutover activities for smooth transition to live operation               <ul style="list-style-type: none"> <li>• Post-go-live support to optimise functionality and leverage vendor updates</li> <li>• Change management and training embedded throughout delivery</li> </ul> </li> </ul> | <ul style="list-style-type: none"> <li>• Strategic ERP vision and roadmap development through mapping dependencies and risks</li> <li>• Developing procurement tenders with clear tender documentation defining requirement, evaluation criteria and scope</li> <li>• Working with stakeholders to define measurable benefits that justify ERP changes</li> <li>• Providing understanding into how users currently work and creating adoption strategies</li> <li>• Offering independent expertise and advice to support decision-making and ERP management</li> <li>• Business case and investment justification support through outlining options, costs, risks and benefits</li> </ul> |

Highlighting the effectiveness of our ERP solutions, we have worked with major national and international governance bodies such as the Cabinet Office, Ministry of Justice, Foreign, Commonwealth and Development Office. We work with leading platforms such as Oracle Fusion, Workday and SAP, combining industry best practices with proven methodologies. Our approach ensures alignment with organisational goals, compliance with government standards and measurable outcomes.

The pricing for both services is based on a per-day consultancy model. This reflects the time and expertise of the consultants delivering the work, rather than user licenses or system-based charges. The core prices cover the delivery of all professional services required for ERP implementation, support, strategy, advisory and consultancy. Optional add-on, such as training or additional deliverables, are available where buyers require extended capability.

### 3 Core pricing

This section sets out the core pricing for both of our ERP Cloud Software services, with pricing for both listings based on a per-day consultancy model. The prices shown below represent the maximum framework day rates, exclusive of VAT, and cover all professional services required to deliver the offerings. These rates reflect the full cost of consultancy time, expertise and delivery activities. The rates may also be used on a Time & Materials, fixed-price or outcome-based basis where agreed at Call-Off. We have outlined the optional add-on services, such as training or documentation development, which are available separately in Section 4.

#### 3.1 Enterprise Resource Planning (ERP) Cloud Software Implementation and Support Services and ERP Cloud Software Strategy, Advisory and Consultancy pricing

| Role/Level                                | Day rate (excluding VAT) |
|-------------------------------------------|--------------------------|
| <b>Graduate</b>                           | £450                     |
| <b>Junior Consultant</b>                  | £750                     |
| <b>Consultant</b>                         | £950                     |
| <b>Senior Consultant</b>                  | £1,000                   |
| <b>Solution Architect/Project Manager</b> | £1,100                   |
| <b>Programme Manager</b>                  | £1,250                   |
| <b>Director</b>                           | £1,500                   |

Our standards and charging assumptions for day rates include:

- Standard working day: 7.5 hours, exclusive of travel and lunch
- Working week: Monday to Friday excluding national holidays
- Office hours: 09:00 to 17:00, Mon–Fri
- Travel, mileage & subsistence: Chargeable from Central London per client policy

- Charging units: Quarter, half,  $\frac{3}{4}$  and full days

## **4 Optional extras / add-ons**

Optional training, documentation and artefact development are available upon request and are charged using the same day rates as listed in Section 3.1.
