Service

Provision of the cloud-based “Export Controls” software for research where the research project is subject to Export Control licencing and legislation due to the inclusion of software or technologies linked to strategic military and/or dual-use items.

Pricing

Annual Licence

The annual licence fee for Export Controls is £30,000.

Licence fee includes:

- Provision of live and test environments
- Hosting, data back-up, disaster recovery and business continuity services
- Implementation delivery (up to a maximum of 10 days)
- Service & Support Desk
- Single sign-on
- API
- Ongoing system maintenance
- Software and new feature updates
- End of contract data extraction

Additional Support Options

Expert **pre-implementation support** is available where customers require facilitation to map and document export controls compliance and licencing processes to inform configuration of their instance of the software.

This is charged at £1,800 per day and the total cost is dependent on the services required by the customer.

Onboarding support includes:

- Training and support for system administrators
- User documentation
- Data migration
- Internal communications process and content support to help embed the new system across the institution/organisation
- Additional implementation days over the 10 days included in the licence fee where requested/agreed

This is charged at £1,100 per day and the total cost is dependent on the services required by the customer.
