Service

Provision of the cloud-based “Post-Award”, a comprehensive software designed to streamline the management of research awards after funding has been secured. It supports universities in maximising financial compliance, reducing administrative burdens, improving visibility across award portfolios, and ensuring funder reporting obligations are met.

Pricing

Annual Licence

The annual licence fee of the Pre-Award module is £35,000.

Licence fee includes:

- Provision of live and test environments
- Hosting, data back-up, disaster recovery and business continuity services
- Implementation delivery (up to a maximum of 10 days)
- Service & Support Desk
- Single sign-on
- API
- Ongoing system maintenance
- Software and new feature updates
- End of contract data extraction

Additional Support Options

Expert **pre-implementation support** is available where customers require facilitation to map, identify efficiencies or improvements and document Post-Award processes, suitable and configurable for multiple faculties and departments, to inform configuration of their instance of the software.

This is charged at £1,800 per day and the total cost is dependent on the services required by the customer.

Onboarding support includes:

- Training and support for system administrators
- User documentation
- Data migration
- Internal communications process and content support to help embed the new system across the institution/organisation
- Additional implementation days over the 10 days included in the licence fee where requested/agreed

This is charged at £1,100 per day and the total cost is dependent on the services required by the customer.
