1. Overview

VerseOne was founded to use innovative technologies to make a positive difference to people's lives, and this vision is as true today as when the company was founded in 2004.

VerseOne's heritage is in creating interactive websites through blending its Open Standards-based content management software with Information Architecture-driven design, W3C¹ and WAI² standards-compliant web technologies, and secure, high-availability managed hosting services.

Over the lifespan of the company, VerseOne has continued to innovate and has expanded its focus to specialise in integration, automation, and personalisation solutions — all delivered via *secure by design*, user-led interfaces — that deliver real Return on Investment (RoI).

2. Microsoft Graph API Integration

Microsoft's software solutions are powerful tools for driving efficiencies and reducing effort, whilst future-proofing your solutions and fully maximising investment in existing enterprise applications.

Leveraging the power of Microsoft O365 in your intranet or portal can lead to increased productivity, and tight, personalised integration with users' day-to-day tools, leading to higher engagement and swifter RoI.

VerseOne's Autevo provides the bridge that enables Microsoft O365 integration across your digital solutions — using the official Microsoft Graph API integration methods that allow third party partners, such as VerseOne, to harness the power of O365 and other Microsoft applications.

And with the Autevo Platform in place, you can connect to multiple line of business systems, blending your core work systems with the power of Microsoft, and united within a VerseOne communications platform.

¹ The World Wide Web Consortium that sets the standards for all web technologies, including networking protocols, HTML, Cascading Style Sheets (CSS), and more.

² The technical standards for web accessibility are set by the Web Accessibility Initiative: specifications include Web Content Accessibility Guidelines (WCAG 2.0), Authoring Tools Accessibility Guidelines (ATAG) and Accessible Rich Internet Applications (ARIA).

3. VerseOne Microsoft O365 Solutions

Integration projects can vary hugely in extent, and are often conducted in stages in order to allow for better alignment of processes, people, and platforms.

As such, and in line with its founding principle of social good, VerseOne has created a pricing system that reflects the flexible and decoupled nature of VerseOne Autevo projects, i.e that enables customers to scale up or down, or to swap systems in and out.

3.1. Autevo Platform

In order to undertake an integration project, the VerseOne Autevo platform needs to be licensed and installed.

Item	Edition	Price Range (per annum)
VerseOne Autevo	Essentials	£3,800 – £5,000
VerseOne Autevo	Enterprise (2+ Connectors)	£2,500 – £3,500
VerseOne Autevo	Enterprise Plus (4+ Connectors)	£3,500 – £12,000

3.2. Microsoft Connectors

For each Microsoft application that is integrated, an Autevo Connector and accompanying Channel needs to be licensed and installed.

Microsoft provides a large number of interfaces across their entire O365 Suite of applications. In order to take advantage of these, a connection to O365 through OpenID Connect (OIDC) is usually required, as well as further configuration by the customer.

As such, there is a range of dedicated Microsoft O365 Connectors that range in scale.

Connector	Method	Price Range (per annum)
Microsoft Active Directory Authentication <i>(usually included with all VerseOne Employee Experience Intranets)</i>	ADFS / OIDC / NHS Mail	£1,200 – £5,000
Microsoft Active Directory Staff Directory	OIDC	£1,800 – £8,000

Connector	Method	Price Range (per annum)
Microsoft Teams Integration	OIDC	£1,800 – £8,000
Microsoft Calendar Integration	OIDC	£1,800 – £8,000
Microsoft Sharepoint Integration	OIDC	£2,500 – £12,000
Microsoft Delve Integration	OIDC	£2,500 – £12,000
Microsoft Premium Module* Integration	OIDC	£3,000 – £15,000

** Microsoft Premium Module Integration enables custom Autevo–MS Integration Channels to be built and enabled using the existing Autevo Software Development Kit (SDK).*

4. VerseOne Autevo Solution Services

The pricing schedules above outline the licence ranges for Autevo solutions: depending on the exact nature of the project, VerseOne Services will also be required. The rate card for the services is outlined in VerseOne’s Services lot, and indicative pricing will be provided after initial scoping of the project.
