Who We Are

For over a decade, our team has delivered advanced solutions across **software engineering, electronics** and **artificial intelligence**. We've built products, platforms and technologies that have powered real-world transformation in multiple industries.

Today, we use our proven capability to bring the benefits of **space** to all organisations. Applying our engineering depth, integration expertise and commercial product mindset to unlock the next generation of space-enabled transformation.

About Us

The UK leaders in Space-Enabled Transformation.

Bridging the gap between space technologies and on-earth impact

Proven Track Record

- Founded in 2014, with expertise in digital transformation
- Supporting the Space Industry since 2020
 - Co-developed the UK Space Domain Awareness capability
 - Supported formation of the National Space Operations Centre (NSpOC)

Our clients

- Government & Public Sector
- Private Enterprise

Beyond Delivery: Research & Innovation

Committed to advancing the adoption of space-enabled technologies through:

- Applied research
- Strategic studies
- Innovation programs focused on efficiency, profitability and public value

Lab287 /lab-tuː-eit-ˈseɪn/ noun

1. the UK's leading specialist in space-enabled organisational transformation.

Lab287 help government and public sector bodies, as well as businesses in the private sector, to implement change by putting to work the capabilities and potential of data and technologies originating or located in space.
