1 Articulate 360 AI

The #1 e-learning platform for creating workplace training

Create course content up to 9x faster with integrated AI

Articulate 360 AI is an AI-powered platform designed to simplify and accelerate workplace learning. It enables teams to create, collaborate on, and distribute training content efficiently, with a strong focus on scalability, accessibility, and localization

Get everything you need for better workplace learning

- **Create** - Create course content up to 9x faster with integrated AI
- **Collaborate** - Simplify collaboration with in-app feedback
- **Distribute** - Distribute to any platform, or, use our integrated LMS

1.1 Translate, validate, and manage global eLearning

Localize courses 3x faster

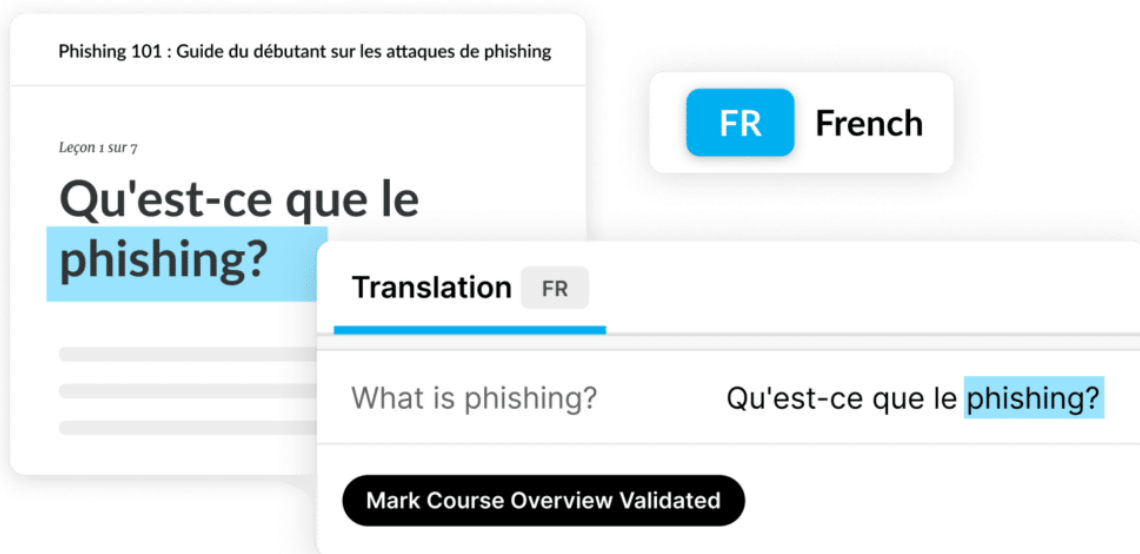

Get end-to-end localization support to speed up course translation, validation, and management.

Achieve high-quality global training

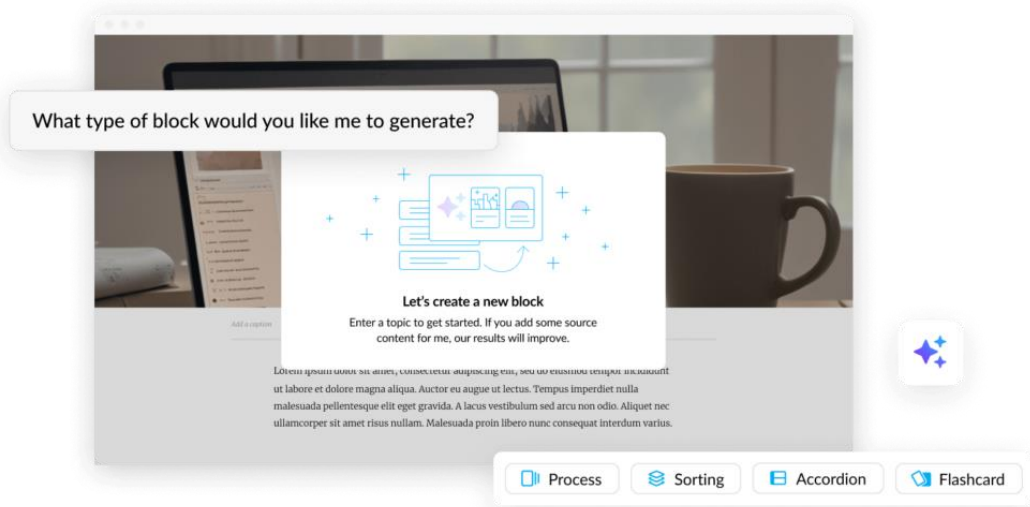

Give language validators full course context to improve translation reviews.

Combine creation and localization workflows

Streamline localization with features built for e-learning and integrated into your authoring apps.

1.2 Get award-winning course creation tools, now with AI magic

Get started faster with AI

- Generate assessments, summaries, blocks, and other course content up to 9x faster
- Convert source material to interactive content with just a few clicks

Create everything, better

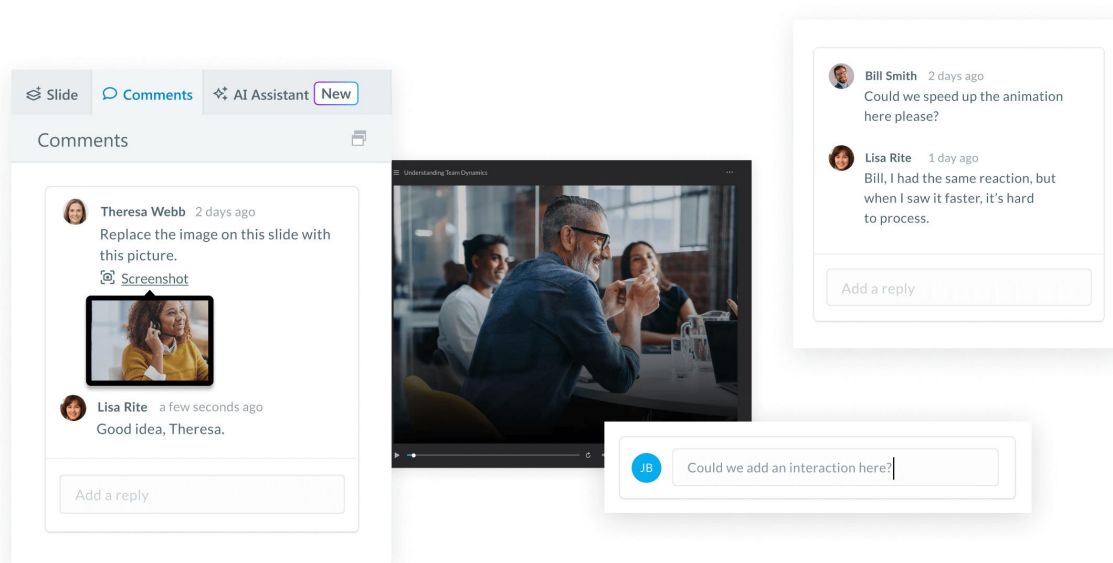

- Build what you need, from microlearning to immersive, interactive courses
- Refine your writing with AI suggestions for tone, grammar, and readability

Make beautiful look easy

- Access 13+ million images and templates right from your course authoring tools
- Generate gorgeous AI images from text descriptions

1.3 Simplify team collaboration and project reviews

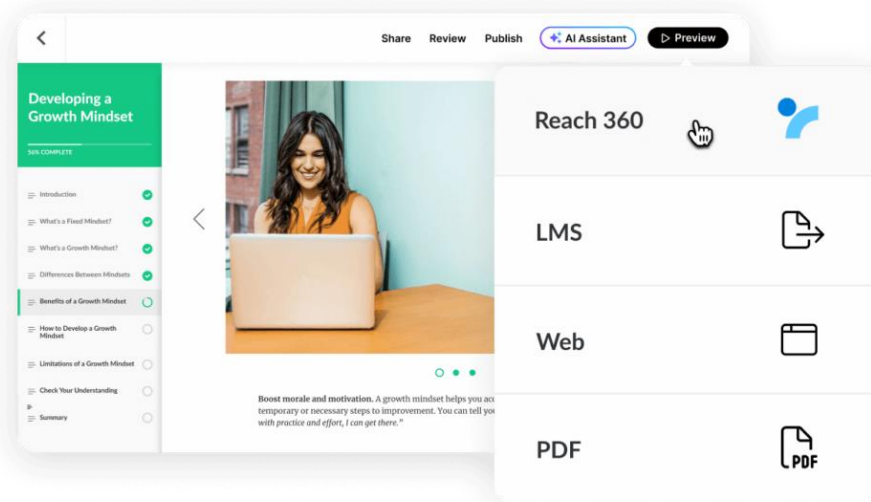

Make it easy for collaborators to share content and for stakeholders to provide feedback on courses—right from a web browser.

1.4 Quickly distribute training to anyone, anywhere

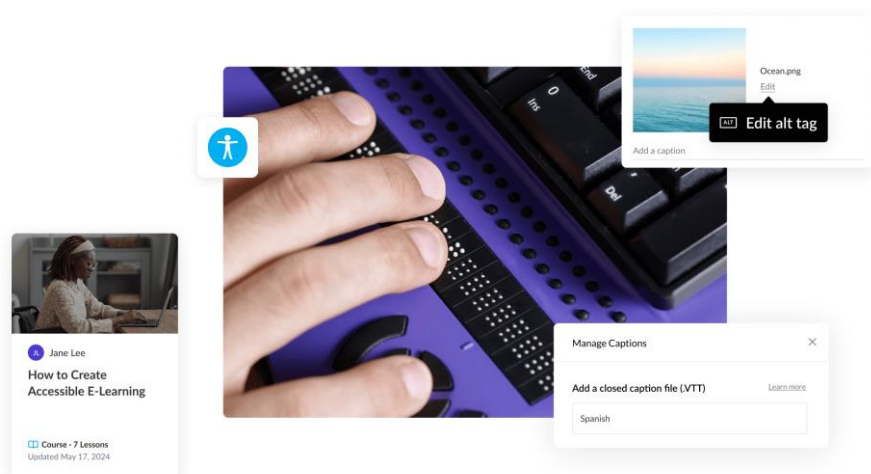

Export training to an existing LMS or deliver it effortlessly with Reach, the frictionless LMS integrated into Articulate 360 AI.

With no implementation required, Reach makes it simple to deliver training to partners, customers, and internal learners.

1.5 Build workplace training that's accessible for all learners

Meet accessibility requirements for accessibility while ensuring that training is enjoyable for all learners. Articulate 360 AI broadly supports Web Content Accessibility Guidelines 2.1 AA criteria for online course creation.

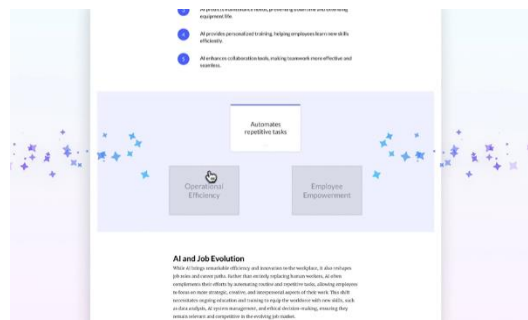

2 AI Assistant in Articulate 360 AI

The AI Assistant is a built-in feature of Articulate 360 AI that accelerates course creation by transforming ideas or source materials into high-quality training content—quickly and efficiently.

2.1 Key Features

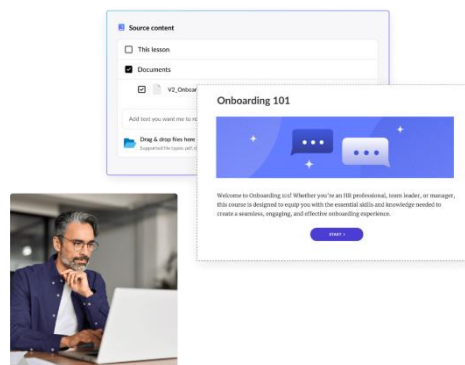

Unlock creativity and productivity

Use our built-in AI to turn a simple prompt or document into an outline, lesson, or full course draft—fast. Then, polish to perfection and publish in days, not weeks.

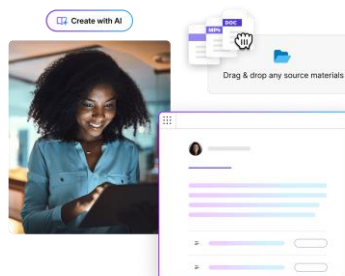

AI, the right way

Stay in the driver's seat with AI that speeds up course creation, without taking over. Built for learning design, AI Assistant gives beginners the guidance they need, and experts the control they want.

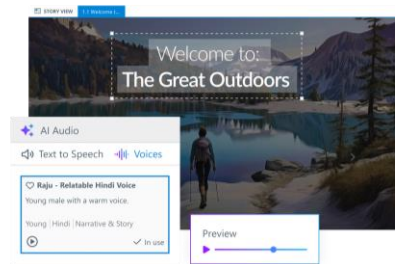

Better, faster creation

Partner with AI Assistant to turn ideas or source materials into high-quality course drafts, instantly. Then, review and refine—and finish in record time.

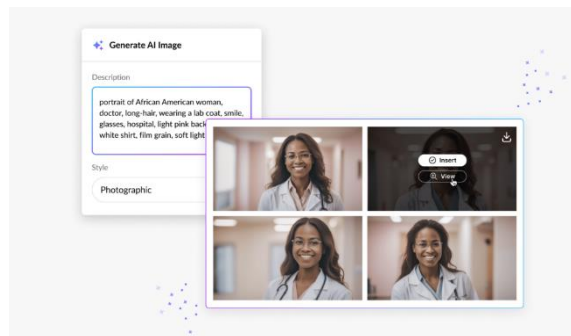

Your all-in-one AI for learning design

Create richer training at AI speed, without juggling multiple tools. From course drafts to images, audio, and more, AI Assistant generates everything you need to engage learners.

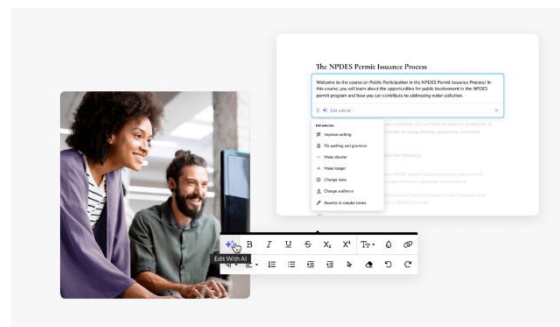

Dazzle your learners

Bring your content to life with stunning imagery and natural voiceover you can generate instantly, right in Articulate 360 AI. With endless image styles and thousands of AI voices, it's like having a full creative team at your fingertips.

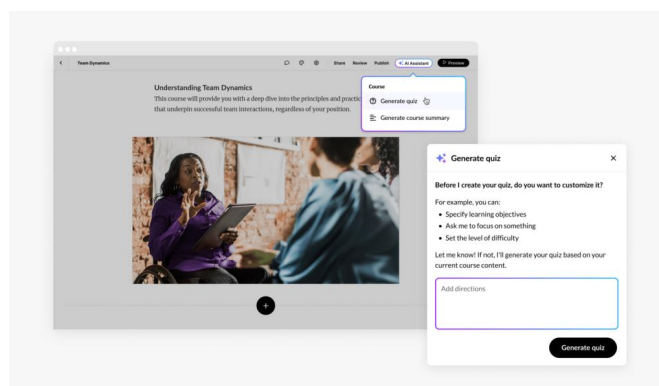

Polish to perfection

AI Assistant makes it easy to draft compelling content. With a click, AI Assistant can change your writing tone and style, check your grammar, improve readability, and even generate additional content.

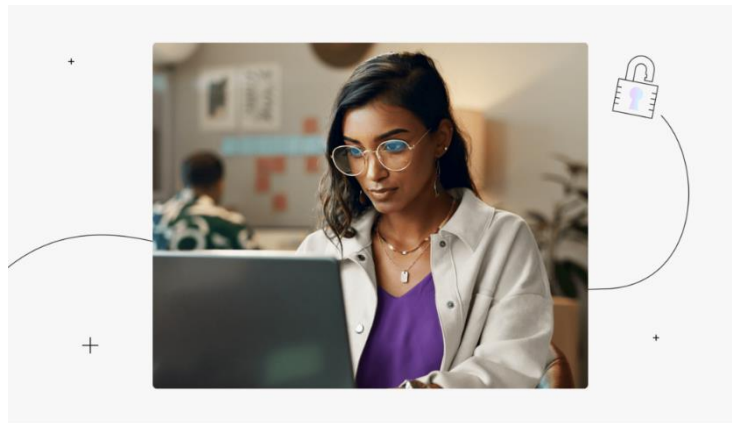

Generate assessments in a snap

Build high-quality quizzes and knowledge checks in minutes with AI Assistant. In just a few clicks, you can generate effective questions based on your course content—and even set a focus topic or difficulty level.

Responsible AI

You're always in control with AI Assistant. Articulate requires zero data retention with our AI sub-processors and we never use your content to train our AI. You and your team can rest easy knowing that AI Assistant is built for transparency, equity, security, and privacy.

3 Rise

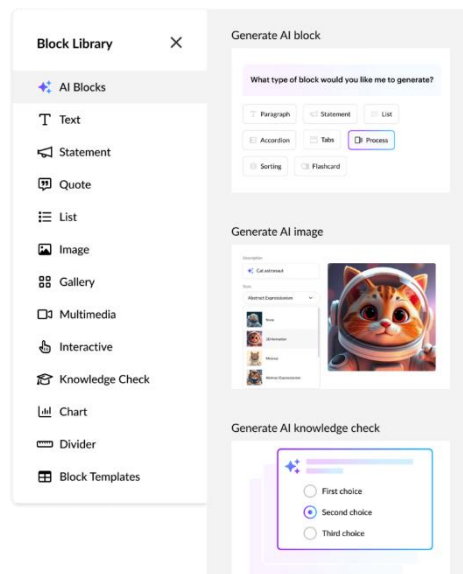

Build stellar courses for any device up to 9x faster with AI

Rise is the #1 software for creating online courses that work on every device. And it now integrates the magic of AI into your workflow. Build even more beautiful, more engaging courses—faster than ever.

3.1 Key Features

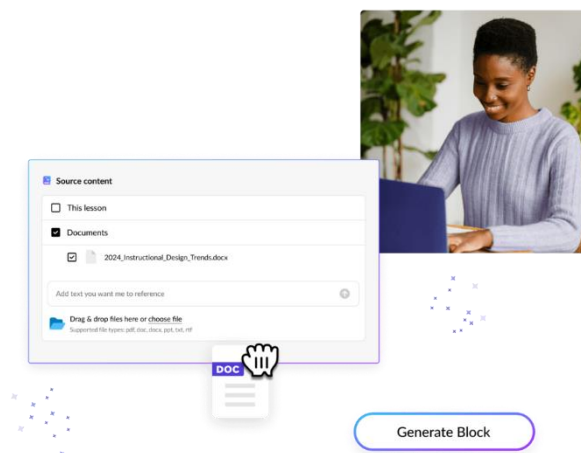

Intuitive, block-based authoring

Rise makes web-based course authoring simple and fast. You simply stack and arrange modular media, text, and interactive blocks, then add your own content to create gorgeous training easily. And with the integrated AI Assistant, inspiration is just a click away.

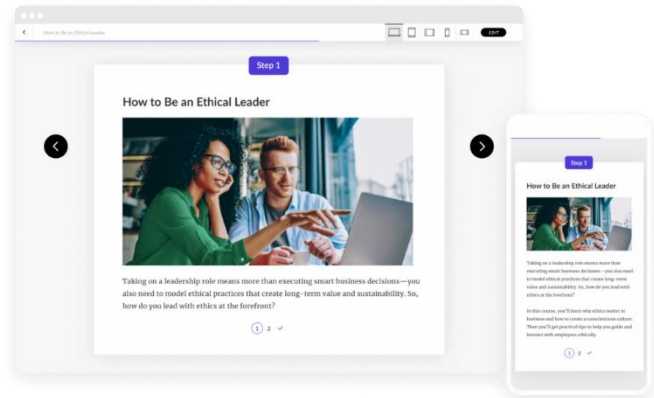

AI, the right way

Stay in the driver's seat. AI Assistant accelerates online course creation, but doesn't take it over. Our proprietary AI Assistant is built for instructional design, so you'll get high-quality help, every time.

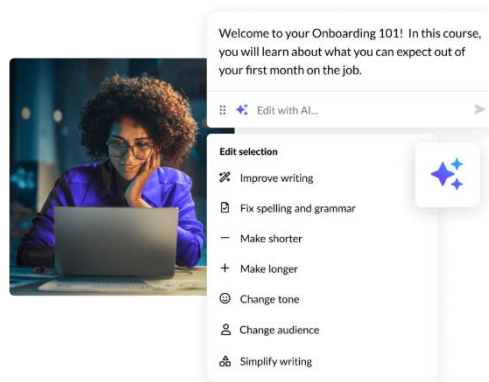

Perfect on every device

Build your course once and it automatically adapts for every device and orientation—beautifully. Whether they're at a desk or in the field, your learners always have an optimal experience.

Better, faster

Get industry-leading, high-quality course authoring, accelerated with AI. With Rise plus AI Assistant, you'll create exceptional online courses up to 9X times faster.

3.2 Content creation, your way

Online course creation has never been easier. With Rise, you can start from scratch, use a template, or partner with AI Assistant to build great content.

Choose your format

Craft the best course to meet your learning objectives. With Rise, you can easily create any type of training—from full-length courses and guides to highly-focused performance support and microlearnings.

Build from scratch

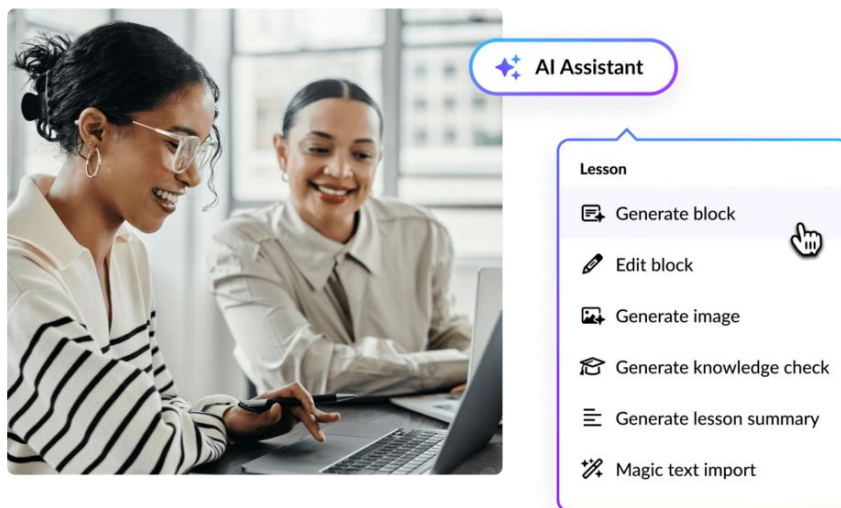

Create unique lessons by choosing text, media, and interactive blocks from an extensive library—and stacking them any way you want.

Start from a template

Jumpstart course creation with 1,000+ course templates designed by eLearning experts. Templates include customizable content on the most common training topics.

Partner with AI Assistant

Lean on AI Assistant to outline and draft content for your learning blocks. You can point AI Assistant to your own source material or prompt it to research information for you.

3.3 Enjoyable and effective, every time

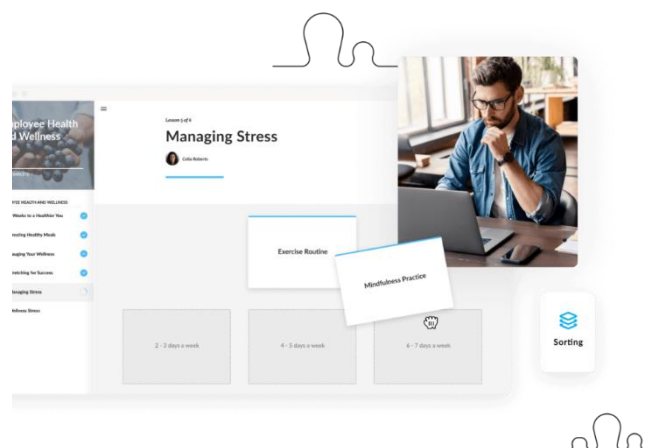

Keep learners engaged with compelling interactivity, insightful knowledge checks, and effective quizzes—all super easy to build in Rise.

Motivate with interactivity

Add interactive sorting, labelled graphic, process, timeline, and accordion blocks to create lean-forward moments. Use the scenario block to let learners apply new skills. And use AI Assistant to explore different block types for your content—on the fly.

Reinforce learning with assessments

Test what learners know and underscore key skills by adding assessments to your Rise course. You can build knowledge checks and multiple choice, multiple response, fill-in-the-blank, or matching quizzes from scratch or let AI Assistant craft them for you based on the course's content.

3.4 Mind-blowingly gorgeous

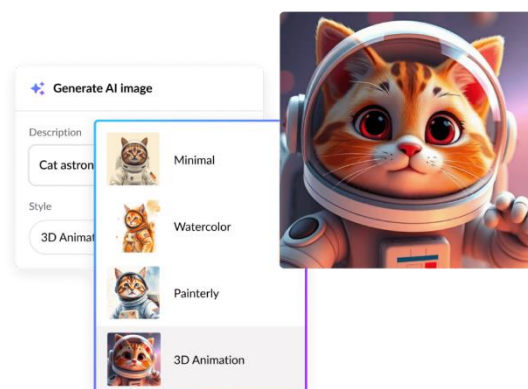

Dazzle your learners with beautiful, media-rich content. Browse the 13+ million image library included in Rise or use the AI Assistant to generate unique images for you.

Choose your style

Ask AI Assistant to generate images in your preferred visual style or create your own for a custom look.

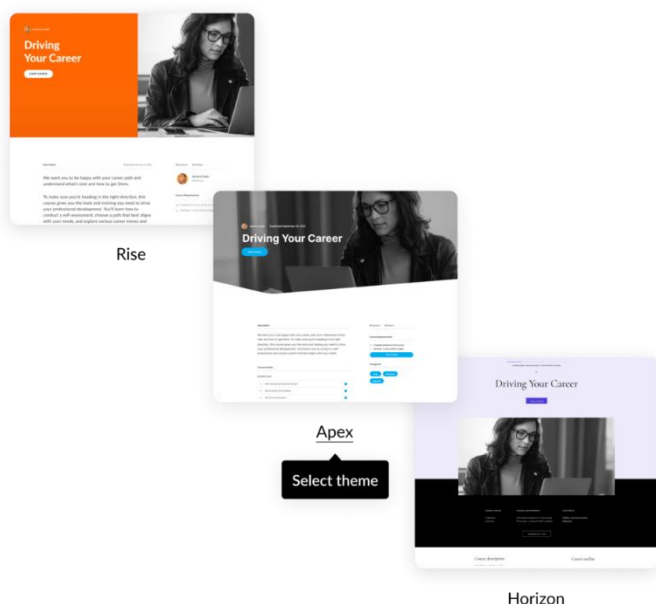

Add custom content

Generate images that fit your unique needs. AI Assistant makes it feel like you have your very own art department at your fingertips.

3.5 Customised and polished

Fine-tune the way your courses look and feel. Rise gives you the granular control you need to perfect the learner experience.

Set the theme

Make every Rise course feel unique with professionally designed course themes, each with its own distinct style.

Polish your content

Ask AI Assistant to change the writing tone, check your grammar, improve readability, and generate additional content.

3.6 Team collaboration, simplified

Finish projects faster by working with team members.

Collaborate on courses

Invite team members to create and edit different lessons simultaneously, or take turns on the same one. All changes happen in real time.

Share your work

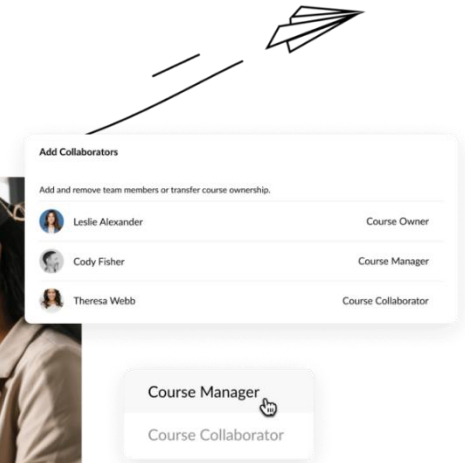

Help your team build courses faster by saving blocks and their content as templates, then sharing them with your team for reuse in other lessons.

Stay organized

Use team folders to organise your content and assign permissions for better collaboration.

Get reviews done fast

Streamline reviews by gathering in-context feedback on your courses from stakeholders. Comments, tasks, and notifications keep the review process moving smoothly.

4 Storyline

Build any course imaginable up to 9x faster with AI

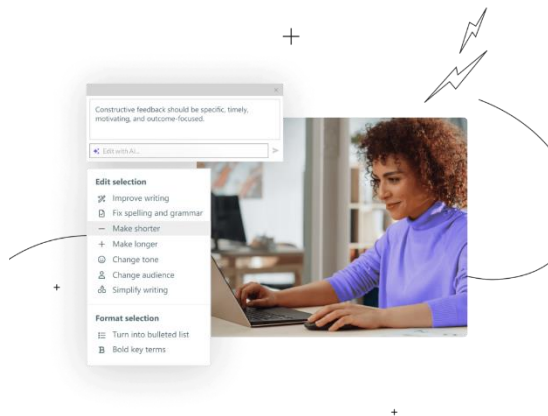

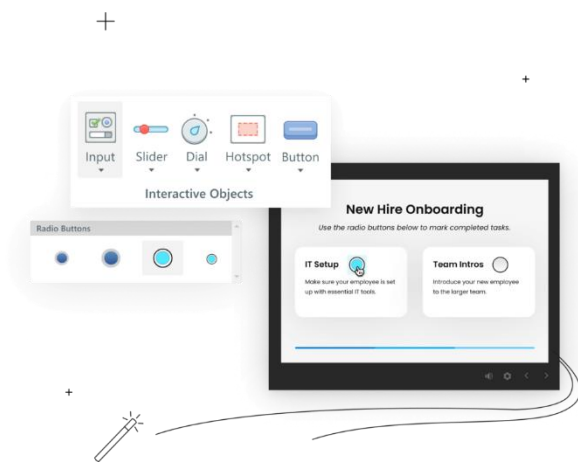

Storyline is the top software for creating custom, interactive e-learning. And it now integrates the magic of AI, so you can create immersive courses faster than ever before.

Powerhouse course authoring, supercharged with AI

Build any training you can imagine with the industry's leading e-learning authoring tool, now infused with AI that's been specifically built for instructional design.

Dream it, build it

Design dynamic learning experiences with any interaction imaginable. Storyline makes it easy to turn static training content into engaging, interactive courses.

Polish to perfection

Perfect your course with help from the integrated AI Assistant. Ask it to change your writing tone, check your grammar, improve readability, generate additional content, and more.

4.1 Engaging interactivity, without limits

Create virtually any interaction under the sun. Storyline is simple enough for beginners, yet powerful enough for experts.

Build any interaction

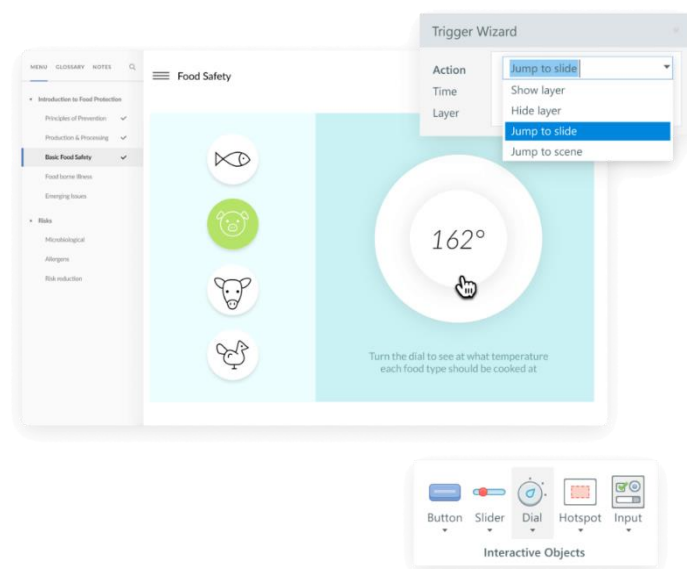

Create any interaction you can imagine with the slide layers, triggers, and states in Storyline. Learners can click, hover over, or drag any object to trigger any action.

Get instant interactivity

Drop buttons, dials, sliders, markers, and hotspots on your slide to add course interactivity in seconds. With a few clicks, you'll have an engaging interaction.

Personalise interactions

Respond to learners with dynamic, personalized training content. With the variables in Storyline, you can customize interactivity to the max with minimal effort.

4.2 Show, don't tell

Build more engaging content with video, simulations, and background audio. Storyline makes it fast and easy to give learners an immersive experience.

Build any interaction

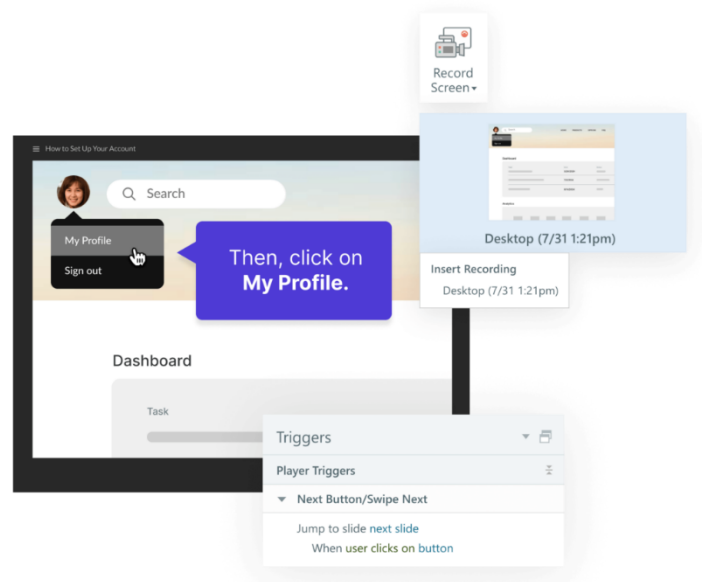

Create any interaction you can imagine with the slide layers, triggers, and states in Storyline. Learners can click, hover over, or drag any object to trigger any action.

Get instant interactivity

Drop buttons, dials, sliders, markers, and hotspots on your slide to add course interactivity in seconds. With a few clicks, you'll have an engaging interaction.

Personalise interactions

Respond to learners with dynamic, personalized training content. With the variables in Storyline, you can customize interactivity to the max with minimal effort.

4.3 Discover what learners know

Assess online learners any way you want.

Create the right quiz for the job

Build insightful assessments quickly by using 25 different question types, importing existing questions, or asking AI Assistant to generate quizzes from your course content.

Keep learners on their toes

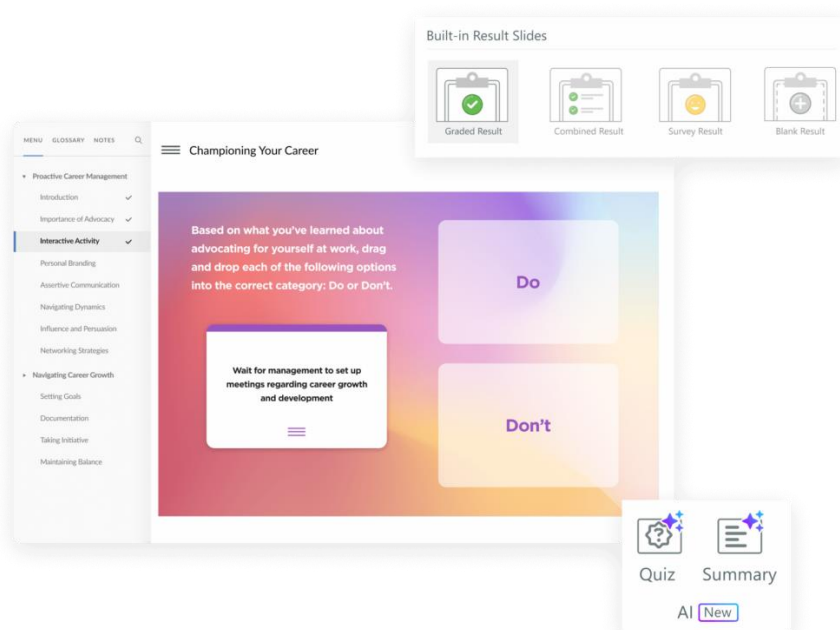

Pool and randomize questions to keep content fresh and learners engaged. And turn objects into drag-and-drop and other decision-making activities in minutes.

Get the real picture

Discourage guessing with negative scoring, test throughout your course to get a clear view of performance, and combine results from multiple quizzes for a final score.

Let learners practice

Build realistic, branching scenarios that let learners apply their new skills to real-world situations.

4.4 Mind-blowingly gorgeous

Dazzle your learners with beautiful media and versatile characters. Browse the 13+ million asset library included in Storyline or use AI Assistant to generate unique images for you.

Give courses character

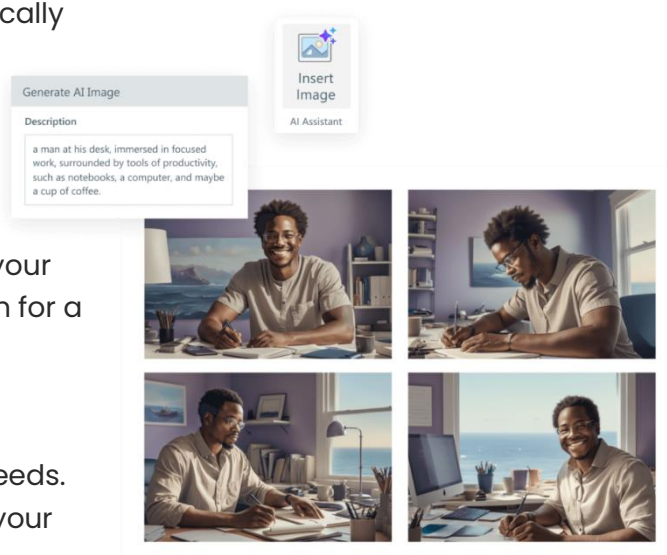

Insert characters from the extensive library to add personality to your course. Dynamically change poses and expressions to build relatable branching scenarios and interactions.

Choose your style

Ask AI Assistant to generate images in your preferred visual style or create your own for a custom look.

Add custom content

Generate images that fit your unique needs. AI Assistant makes it feel like you have your very own art department at your fingertips. Build realistic, branching scenarios that let learners apply their new skills to real-world situations.

4.5 Make collaboration easy

Finish projects faster by working with team members

Share your slides

Create a collection of shared team slides that everyone can access right from Storyline. Upload branded project templates, share slides that need to be in every course, and give teammates access to reusable slide content.

Access from anywhere

Upload Storyline projects to the cloud so your authoring team can access any version of your course, anywhere, at any time.

Get reviews done fast

Streamline reviews by gathering in-context feedback on your courses from stakeholders. Comments, tasks, and notifications keep the review process moving smoothly.

4.6 Deliver to everyone, everywhere

Optimise for every device

Deliver an ideal learner experience for every screen size and orientation with the responsive player in Storyline. It adjusts video quality based on internet speed, allows learners to adjust playback speed, includes closed captions and transcripts, and supports touchscreen gestures.

Distribute and track

Publish Tin Can API 1.0-, SCORM-, and AICC-compliant content to your learning management system (LMS) or to Reach, the frictionless LMS integrated with Storyline.

Localize content

Easily translate courses for learners across the globe. Storyline supports right-to-left languages such as Hebrew and Arabic and double-byte character sets for languages such as Chinese, Japanese, and Korean.

Boost accessibility

Build courses to help meet the requirements of Section 508 and WCAG. By default, Storyline projects use accessible feedback layers, support closed captions with customizable positioning, include accessible navigation, and more.

5 Localization

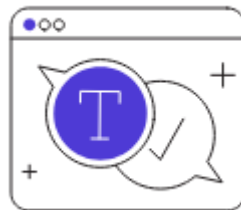

Take training global with Articulate Localization – Localize your online courses 3x faster.

Do more with the platform you love – Translate, validate, and manage e-learning for your global workforce—all without leaving Articulate 360 AI.

Translate in seconds

Create multiple language versions of your course with just a few clicks using instant AI translation

Achieve high quality with fewer rewrites

Give language validators access to real-time translation review and editing in the context of your course

Simplify your entire workflow

View, manage, and publish multiple language versions of any course as a single item

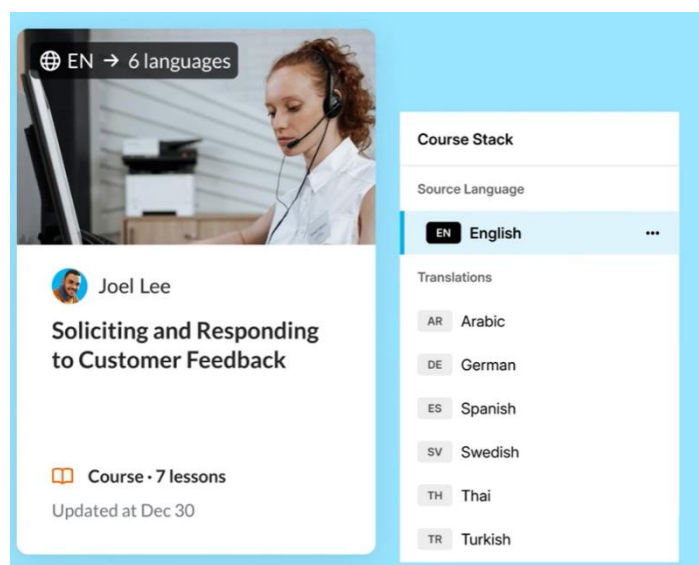

5.1 Instant translation – Translate in seconds

80+ languages

Translate courses into 80+ languages, all from Articulate 360 AI. Plus, easily handle right-to-left content and tailor translations for regional variations and formality.

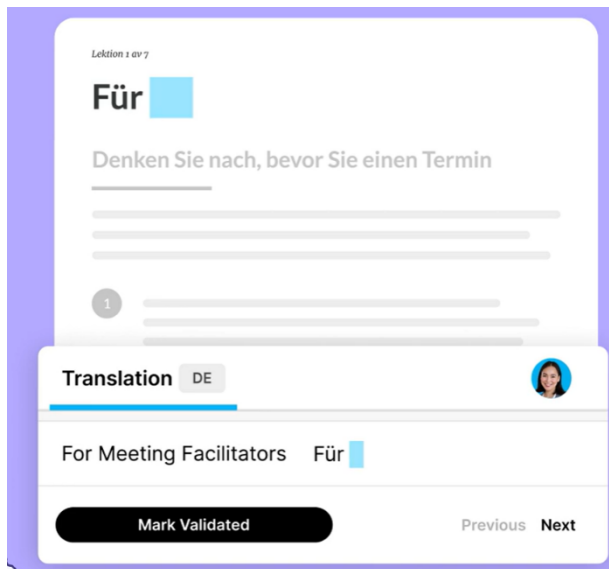

Custom glossaries

Keep every language version of your course on brand. Simply upload a glossary (or multiple) and specific words and phrases will be translated the same way, every time, across your entire subscription.

5.2 In-context language validation

Cut validation time from weeks to hours.

Accurate validation made easy

Create consistent, high-quality translations by publishing your content to Articulate Review for language validators, whether they're on your subscription or not.

Real-time review

See edits to translations in real-time and import changes instantly. No more sorting through file versions, just streamlined validation that's easier for everyone

5.3 Multi-language workflow management

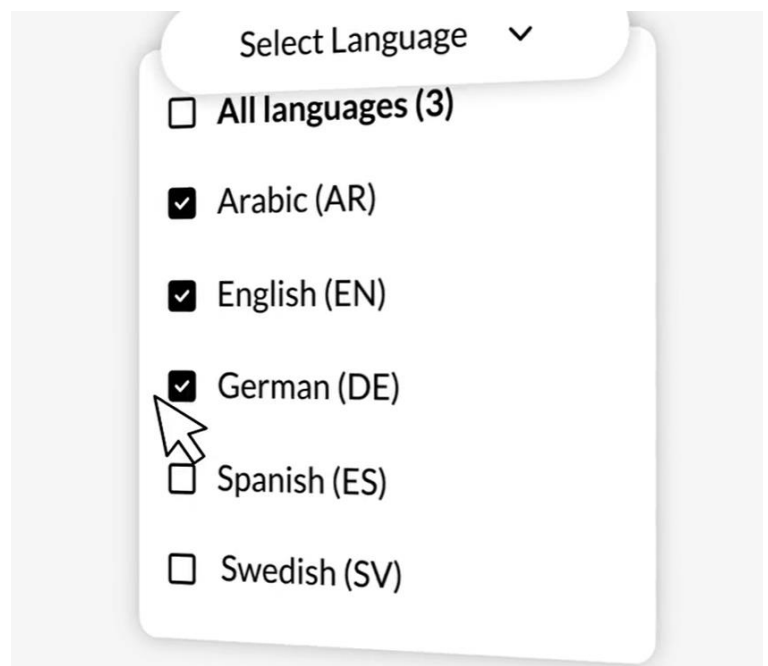

Manage fewer files and systems for effortless version control

Multiple language versions, one course package

Save time and reduce complexity in your workflow by viewing, managing, and exporting multiple language versions of a course as a single item.

Intuitive and integrated

No more learning new systems and switching between apps. It's easy to create, localize, and distribute courses all within Articulate 360 AI when you use Articulate Localization and our frictionless LMS, Reach.

6 Review

Streamline course collaboration and review

Review is a web-based tool integrated with Articulate 360 AI that simplifies project reviews, feedback, and approvals.

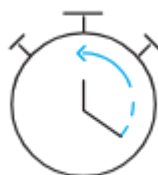

Simplify project reviews

With everything in one place, you won't need to rely on emails and external docs to gather stakeholder feedback.

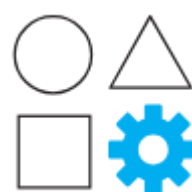

Keep collaborators in the loop

Make your course available to every reviewer, everywhere, with a simple web-based app for real-time collaboration

Speed up reviews

Get to finished faster with in-context reviews, comments, and tasks integrated right into the course authoring workflow

Stay organized

Organize courses into folders that you can easily share with internal and external teams

Key Features

Web-based app

Make it easy for internal and external collaborators to share their feedback. Anyone can access Review directly from a web browser, even if they don't have Articulate 360 AI.

Real-time feedback

Receive, review, and revise feedback directly in your course, in real time. Invite multiple collaborators to review courses at once, and you'll see in-context feedback with attached screenshots as soon as it's shared.

End-to-end review workflow

Stay in sync effortlessly. Request reviews, assign due dates, send reminders, and resolve threaded comments from all stakeholders—in one place.

In-context translation validation

Add Articulate Localization to accelerate localization projects in Review. Assign validators to review translated versions of a course, preview their suggested changes in real time, and import their suggestions—all in the context of your course.

7 Reach

Distribute training in minutes

Reach makes it easy to deliver and track Articulate 360 AI training — no LMS headaches, no delays.

Training delivered with zero friction

Reach connects seamlessly with Articulate 360 AI, so you can launch training, manage users, and measure success—all without the usual LMS complexity.

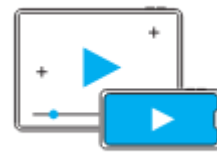

Instant setup

Say goodbye to LMS headaches. Reach is integrated into Articulate 360 AI—no extra tools, no tech team required.

Intuitive administration

Manage content distribution, user access, and learner progress from a single dashboard.

Delightful for learners

Give learners training that looks great and works anywhere, on any device.

Streamline global training delivery

Fast distribution

Instantly deliver Articulate 360 AI content and avoid time-consuming file export, upload, and compatibility bottlenecks.

Multi-language course delivery

Distribute and manage multilingual versions of a course as a single file with Articulate Localization—reducing update times and simplifying version management.

Optimise management and tracking

Manage learners with ease

Register learners with SSO or using a QR code, link, or bulk CSV upload. Keep learners engaged with smart reminders via email, Slack, or Microsoft Teams.

Enrich the learner experience

Effective tracking and reporting

See learner progress in real time with an easy-to-use dashboard. If you need to dig deeper, export reports as CSV files with one click.

Automated workflows

Use Slack, Microsoft Teams, Zapier, or custom API integrations to automate training delivery, learner management, and analytics.

Training that works everywhere

Give learners a clean, responsive experience that's easy to access on any device—and in their preferred language.

Branded learner experiences

Make training feel like your company. Customize your domain, colors, logos, and messaging.

8 Additional Services

8.1 Articulate 360 AI AI: Training by Omniplex Learning

Our Trainers

Our talented Trainers have all worked in and/or managed L&D departments and have vast experience in training L&D professionals in both system training and L&D skills training.

Our training courses are designed from years of experience in this space. They understand our client's needs and challenges because they were clients themselves.

Each Omniplex Learning Trainer is an eLearning practitioner and works closely with Omniplex Studio, our own digital learning design team.

- UK's only Articulate certified training
- Our Trainers work on a day-to-day basis with advanced experts in Storyline, Videography, Graphic Design & Instructional Designers to keep up to date with industry trends and system advancements
- 800 training hours per trainer per year
- Our trainers combined bring with them 50+ years of L&D experience
- 1000 + L&D Professionals trained each year – we are the Trainers for the Trainers
- Training Experience Survey averages at 9.8/10

As the sole certified UK training partner of Articulate, we provide outstanding training and upskilling on digital learning for the Articulate 360 AI toolset. Delivered virtually or face to face, this allows you and your team to gain confidence and new skills, ultimately to help develop your organisations' in-house capabilities for content creation. We also provide training in Instructional Design and the Vyond Software described below.

Our Courses

Articulate Rise

Providing eLearning developers, instructional designers and subject matter experts with the knowledge and skillset to design, build and distribute your own rapid eLearning programmes using Rise, Replay and Peek software.

Articulate Storyline

Discover how to use Articulate Storyline to create innovative and interactive digital learning programmes.

- Learn how to use variables to create dynamic and personalised learning experiences
- Discover how to use branching scenarios to help your learners author their own learning journeys whilst being in a safe space to make mistakes
- Build engaging slides and media including audio, video and graphics

Articulate Advanced Storyline

Improve your learners experience by working smarter not harder using Storyline.

This practical and hands-on two-day course is designed for Storyline users that are ready to get more creative with their content. You will learn how to maximise the advanced features of Storyline, in the smartest way possible.

The best practices in this course are industry secrets, based on what some of the best Storyline designers do to create engaging eLearning without overcomplicating the build.

The course covers modern and effective gamification, advanced media, advanced variables and how to re-think your text in creative ways to avoid boring, text heavy slides.

Diploma in Instructional Design

An ITOL accredited diploma to master the art of creating memorable learning experiences.

A key skill that anyone in L&D needs to know is how to organise learning content into a format that your learners can follow and understand.

This Instructional Design diploma provides an overview of the theories, frameworks and the necessary tools to design high impact, end-to-end digital learning experiences.

This course content and teaching methodology has met the highest standards of rigor and comprehensiveness. ITOL accredited courses are recognised and valued by employers and academic institutions globally. Accreditation signifies that you can count this activity towards your Continuing Professional Development (CPD).

Diploma in Visual Design

First impressions matter and your learning content is no exception

Effective visual design can help you clearly communicate ideas, guide learners through material and accelerate knowledge retention. For the modern learner, well-

designed visuals can be the difference between gaining their full attention or losing their focus instantly.

In this ITOL accredited diploma course, master effective design principles and equip yourself with proven methods for creating professional and impactful visuals. Learn clever strategies for hooking your learners and showcasing your key messages in a range of formats from eBooks to PowerPoints.

Articulate 360 AI – eLearning Accessibility

Building in accessibility in your eLearning programmes is no longer an option, it is a necessity. This course will:

- Guide you through the current legislation
- Demonstrate what is expected when designing accessible eLearning courses
- Showcase the accessibility features for Articulate Storyline and Articulate Rise

Introduction to eLearning Accessibility

This course is aimed at anyone who is creating or testing digital learning and is ideal for those new to accessibility. Our course provides an overview of the WCAG 2.2 guidelines and breaks them down into easy-to-understand summaries.

8.2 Articulate 360 AI: Enable+ Support

What's included in your Enable+ Plan:

Personalised support

Unlimited access to our dedicated support team who will work with you on a 1:1 basis, either via email, video call or phone. They will work with you on your specific issue to help triage, enable and resolve.

Product release deep-dive

Join our monthly sessions with our product experts where you will get to see new features just released by Articulate in action and how you can make the most of them within your organisation.

Available from June 2026

Live Enablement Sessions

Access to live enablement sessions to empower your users of all abilities to get to grips with articulate and make the most of its feature set.

6 live sessions, ran twice a month, are included in the programme with the ability to jump in and join when it best suits you!

Available from May 2026

Ask the expert sessions

Need to explore the art of the possible with an expert? Perhaps ideate with an instructional design about how you can best break down a piece of content?

Why not book a session with one of our learning experts.

Available from June 2026

TBC Supercharged sessions

Ever wanted to know the secrets to creating seamless systems training? Or perhaps what is the best way to create a mobile friendly experience? Supercharged sessions are designed to deepdive into L&D biggest topics and share secrets on how you can create the best learning experience.

Available from July 2026 onwards

Development Clinics

Drop into one of our monthly development clinics where our experts will be on hand to take questions live and share best practices when it comes to development in Storyline and beyond.

Available from July 2026 onwards

Quickstart Sessions

Quick start sessions are concise, workshops designed to introduce beginners to the key features of Storyline, RISE, Articulate AI, and Localization.

These sessions provide an efficient overview, enabling participants to quickly understand and utilise these tools. By focusing on essential functionalities, quick start sessions help new users gain the confidence and knowledge needed to get up and running effectively in a short amount of time

Enable+ Sessions

The Enable Plus program offers focused sessions designed to guide participants through the creation of basic eLearning content.

This series serves as a valuable complement to our comprehensive suite of Virtual Training courses. It is especially well-suited for individuals who are new to Articulate, providing them with foundational skills and confidence to develop engaging online learning experiences.

8.3 Articulate 360 AI: Digital Learning Content services

Digital Learning Custom Content Design and Creation

At Omniplex Learning we combine your knowledge of your learners and business, with our team's expertise in digital learning to provide a truly effective learning solution you can be proud of!

Established as the only UK partner of Articulate (award-winning authoring applications) in 2009 we take advantage of our industry knowledge and expertise in

Articulate 360 AI to transform digital learning within public sector organisations, delivering engaging and immersive experiences time and again.

Exclusively utilising the Articulate 360 AI suite to develop digital learning courses, our internal team of Content Developers and Instructional Designers are subject matter experts (SMEs) of these tools. When working with us, you can be assured that you will be working with a strategic learning partner who understands Articulate better than anyone.

Whether it is helping to frame your learning strategy, building an entire curriculum, or a standalone course, we will provide a solution that puts the learner first. We will work with you to capture your knowledge and convert it into a learning solution which will educate your learners and create an experience that will engage, inspire and most importantly, deliver to your required learning objectives.

We understand what makes learning design truly universal. We take the time to understand your needs and apply our expertise in user experience, graphic design and learning design best practice, to create content that is meaningful, intuitive, and memorable. We will partner closely with you to ensure your learning showcases the unique culture of your organisation.

Using innovative technology and great learning design is just the beginning though; our aim is to make eLearning exciting – creating show-stopping learning for you, every time.

Learning Design Templates

Well-designed eLearning can transform a learning experience but despite its value; premium graphic design and expert knowledge of Articulate is not always achievable within an in-house team.

This can be down to several challenges felt by in-house L&D teams such as time constraints or resource restrictions, and this is where our pre-built Articulate 360 AI templates can help you!

Our team of graphic designers and content developers will create a suite of custom branded template slides that allow you to take a step back, relax and focus on crafting your all-important course content.

We think about the design, navigation, and the required functionality of your course: giving you complete autonomy to create your content at speed in a beautifully designed, pre-built framework.

- **Your content:** We want to empower you, and your team to create premium looking eLearning. We will give you all the resources and source files on completion.

- **Your brand:** We take your brand guidelines to create beautiful and intuitive courses for your learners.
- **Our quality:** We have years of experience creating eLearning courses for some of the biggest companies in the world. All our pre-built template packs are created to an industry-leading quality, every time.

We offer a range of different options including Rise template packs and 3 different tier options you can select from our Storyline template range.

Click here for more information on the different [Template Packs available](#).
