

SharePoint Development & Design

SharePoint Online is the place for storing files and sharing information with your organisation.

But how do you use it to its full potential?

Hable will build you a custom site to your specifications. Run workshops to show you what's possible. And deliver learning sessions to improve confidence and knowledge.

A SharePoint project with Hable might include:

-  A discovery workshop, looking at the “art of the possible” with SharePoint & learning about your requirements.
-  Design and build of your site including structure, data migration, and branding
-  A full handover to your in-house team with SharePoint admin training and technical training
-  Engaging internal comms campaigns to raise awareness of the new SharePoint system and drive usage
