NIOS-X as-a-service (Infoblox)

NIOS-X as-a-service (Infoblox)

FullProxy's Infoblox NIOS-X as-a-Service delivers a modern, serverless DDI (DNS, DHCP, and IP Address Management) architecture designed for today's hybrid and multi-cloud environments.

By removing the need for physical or virtual appliances, NIOS-X as-a-Service enables organisations to deliver critical network services close to users and workloads, without infrastructure overhead. This infrastructure-free model simplifies operations for CloudOps teams while improving resilience, visibility, and security for NetOps and SecOps.

FullProxy works with organisations to design, deploy, and manage NIOS-X as-a-Service, helping modernise legacy DNS environments, eliminate branch appliances, and streamline network services delivery at scale.

Benefits include:

- Infrastructure-free delivery of DNS, DHCP, and IPAM services.
- Rapid deployment in minutes, not hours or days.
- Reduced operational cost by eliminating on-premises appliances.
- Consistent DDI services across on-prem, hybrid, and multi-cloud environments.
- Elastic scalability aligned with business demand.
- Improved resilience, visibility, and security for critical network services.
- Simplified management for CloudOps, NetOps, and SecOps teams.

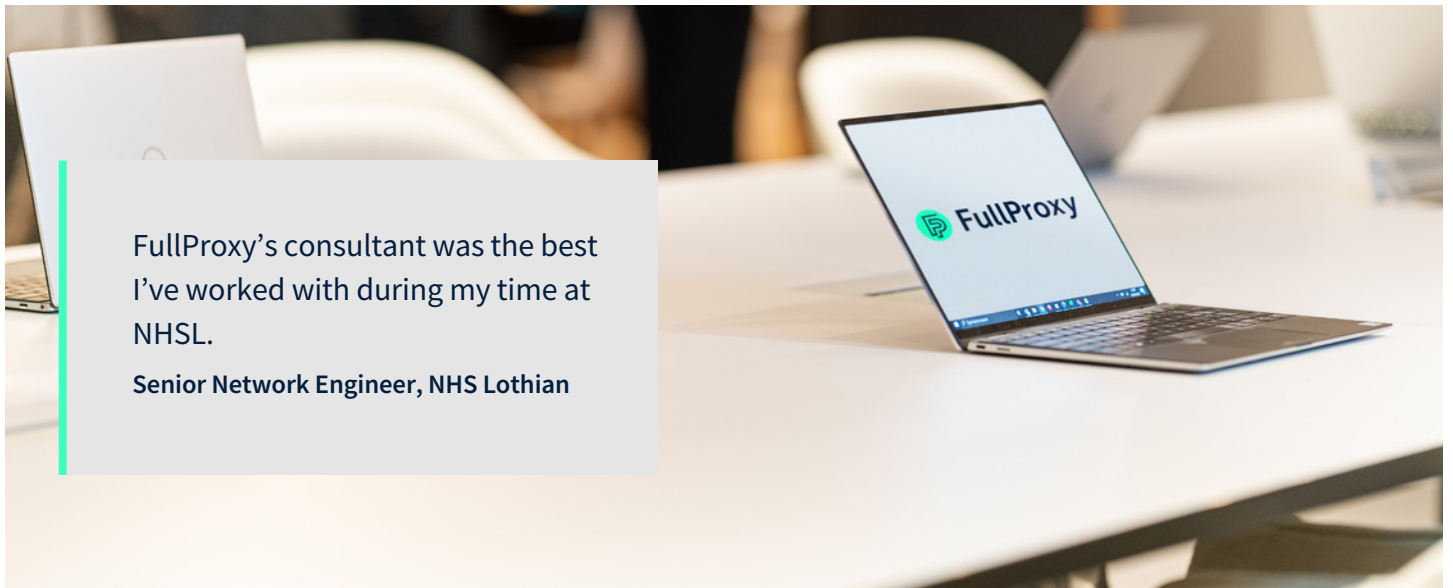

NIOS as-a-service features:

- Infrastructure-free delivery of DNS, DHCP, and IPAM services.
- Rapid deployment in minutes, not hours or days.
- Reduced operational cost by eliminating on-premises appliances.
- Consistent DDI services across on-prem, hybrid, and multi-cloud environments.
- Elastic scalability aligned with business demand.
- Improved resilience, visibility, and security for critical network services.
- Simplified management for CloudOps, NetOps, and SecOps teams.

Why Choose NIOS-X as a Service

NIOS-X as a Service delivers radical simplicity by enabling organisations to deploy critical DNS, DHCP, and IPAM services without installing or maintaining any Infoblox infrastructure on customer premises. As the DDI industry's only true as-a-service deployment model, it provides elastic scalability that automatically adapts as environments grow, while delivering a consistent, unified DDI experience across all major cloud platforms and on-premises environments.

Your Cyber Security Specialists

FullProxy's consultant was the best I've worked with during my time at NHSL.

Senior Network Engineer, NHS Lothian

FullProxy are specialists in Cyber Security and Web Application consultancy. We optimise, install & manage premium cyber security solutions to minimise your security risk and maximise your return on investment.

Why work with FullProxy?

Our highly experienced consultants are Scotland's most certified F5 and Fortinet advisors, ensuring your implementation is seamless, your team is supported, and you achieve ROI from your implementation as soon as possible.

We also provide bespoke cyber security and web application strategy, with a curated portfolio of partner technologies to suit your needs.

FullProxy's size means we're agile and independent, so we can work alongside you to optimise the right solution for your organisation.

Our experience

Our extensive experience in delivering Public Sector projects means we have a deep understanding of your challenges and can therefore provide you with a better and more relevant service.

With a proven track record specifically in Healthcare, Education, Local Government, Financial Services and Critical Infrastructure we are trusted and recommended by people like you.

G-Cloud Service Directory

Infrastructure Software as-a-service

- F5 BIG-IP Virtual Edition, Standalone/ELA/Subscription
- Networking (Network as-a-service and SD-WAN)

Software as-a-service

- AI Delivery and Security (F5)
- AppViewX - Certificate Management
- AppViewX PKI
- AppViewX PQC
- Authentication Software (FortiAuthenticator, FortiToken)
- AWS Marketplace
- AWS Marketplace - F5
- Bot Defense (F5)
