Zero Trust Consultancy

Zero Trust Consultancy

Our Zero Trust Consultancy focuses on strategy first, technology second. We work with your organisation to assess current security maturity, define a Zero Trust roadmap, and design an architecture that integrates identity, access, network segmentation, and continuous monitoring. Rather than a one-size-fits-all deployment, we tailor Zero Trust principles to your environment—ensuring security improvements are practical, measurable, and aligned with business outcomes.

Where appropriate, we design and implement Zero Trust Network Access (ZTNA) solutions using industry-leading platforms such as Fortinet ZTNA and Zscaler, enabling secure application access with strong identity verification and policy-driven controls.

Benefits of the service include:

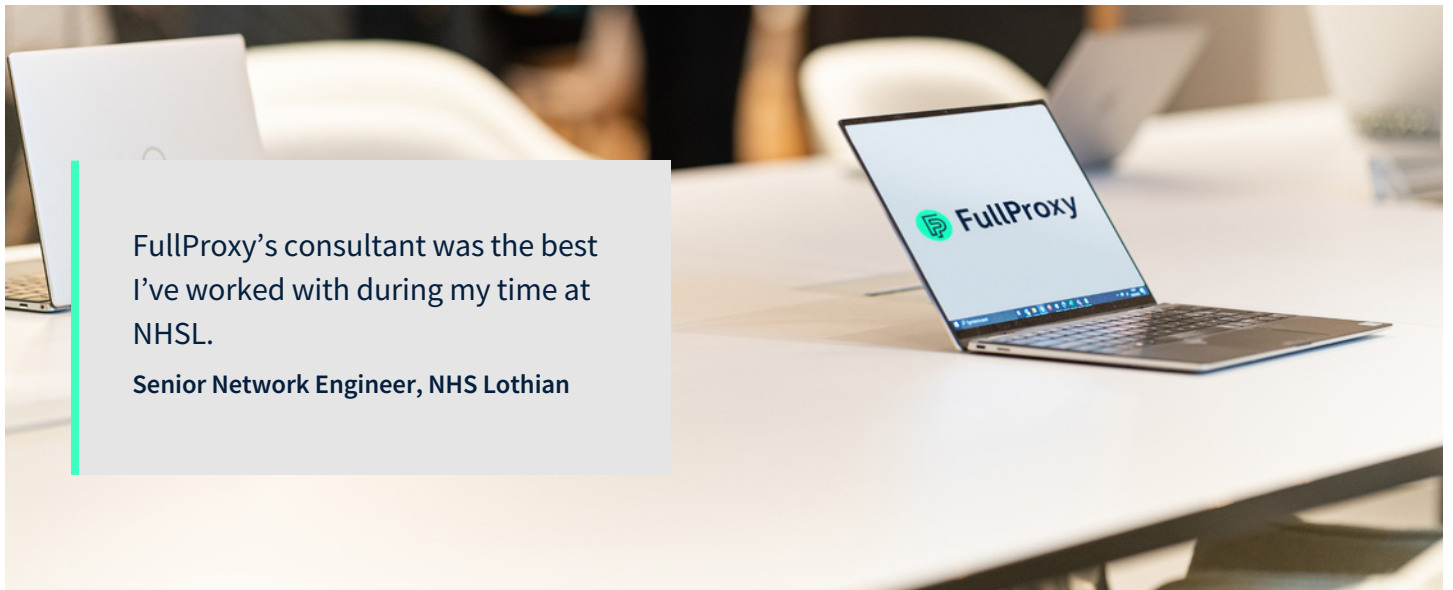

- Eliminate implicit trust and limit lateral movement by enforcing least-privilege access across users, devices, and applications.
- Continuously verify identity, device health, and context to protect against credential theft, ransomware, and insider threats.
- Provide secure, consistent access to applications regardless of user location, without reliance on traditional VPNs.
- Gain granular insight into user behaviour, application access, and security posture across cloud and on-prem environments.
- Support security frameworks and compliance requirements through strong identity, access, and segmentation controls.

What to expect with our Zero Trust consultancy

- Evaluate existing architecture, identity controls, network design, and security gaps against Zero Trust principles.
- Define a phased, business-aligned Zero Trust adoption plan focused on risk reduction and operational efficiency.
- Implement strong identity, authentication, and policy enforcement as the foundation of secure access.
- Design application-level access models that replace or augment traditional VPNs with Zero Trust Network Access.
- Design and integrate Zero Trust solutions using platforms such as Fortinet ZTNA and Zscaler, aligned to your requirements.
- Reduce blast radius by segmenting access to applications and services based on identity, role, and context.

Your Cyber Security Specialists

FullProxy's consultant was the best I've worked with during my time at NHSL.

Senior Network Engineer, NHS Lothian

FullProxy are specialists in Cyber Security and Web Application consultancy. We optimise, install & manage premium cyber security solutions to minimise your security risk and maximise your return on investment.

Why work with FullProxy?

Our highly experienced consultants are Scotland's most certified F5 and Fortinet advisors, ensuring your implementation is seamless, your team is supported, and you achieve ROI from your implementation as soon as possible.

We also provide bespoke cyber security and web application strategy, with a curated portfolio of partner technologies to suit your needs.

FullProxy's size means we're agile and independent, so we can work alongside you to optimise the right solution for your organisation.

Our experience

Our extensive experience in delivering Public Sector projects means we have a deep understanding of your challenges and can therefore provide you with a better and more relevant service.

With a proven track record specifically in Healthcare, Education, Local Government, Financial Services and Critical Infrastructure we are trusted and recommended by people like you.

G-Cloud Service Directory

Infrastructure Software as-a-service

- F5 BIG-IP Virtual Edition, Standalone/ELA/Subscription
- Networking (Network as-a-service and SD-WAN)

Software as-a-service

- AI Delivery and Security (F5)
- AppViewX - Certificate Management
- AppViewX PKI
- AppViewX PQC
- Authentication Software (FortiAuthenticator, FortiToken)
- AWS Marketplace
- AWS Marketplace - F5
- Bot Defense (F5)
- Cloud Services
- Cloudflare
- Content Delivery Network (F5 Distributed Cloud)
- DDoS Mitigation - F5
- DDoS Protection
- Endpoint security (FortiClient & EMS)
- F5 Distributed Cloud API Security
- F5 Distributed Cloud - Client-side Defense
- Firewall as-a-service (Fortigate)
- FortiManager
- Infrastructure and Platform security
- Load Balancing
- Log Management
- NIOS-X as-a-service (Infoblox)
- Pen Testing - Application Security
- Proactive Monitoring
- Security as-a-service (FortiCloud)
- WAF - Application Security
- ZDX (Zscaler)
- ZIA (Zscaler)
- ZPA (Zscaler)
- Zscaler Services
