ZPA (Zscaler Private Access)

ZPA (Zscaler Private Access)

FullProxy's Zscaler Private Access (ZPA) service delivers fast, secure, and reliable access to private applications without the risks and complexity of traditional VPN or VDI solutions. Built on the Zscaler Zero Trust Exchange, ZPA connects authorised users directly to applications based on identity, context, and policy, keeping applications hidden from the public internet and preventing lateral movement.

By removing network-level access entirely, ZPA significantly reduces attack surface while improving performance and user experience for employees, partners, and contractors working from any location.

FullProxy's accredited Zscaler specialists design, deploy, and support ZPA solutions that align with your Zero Trust strategy and operational requirements.

Benefits include:

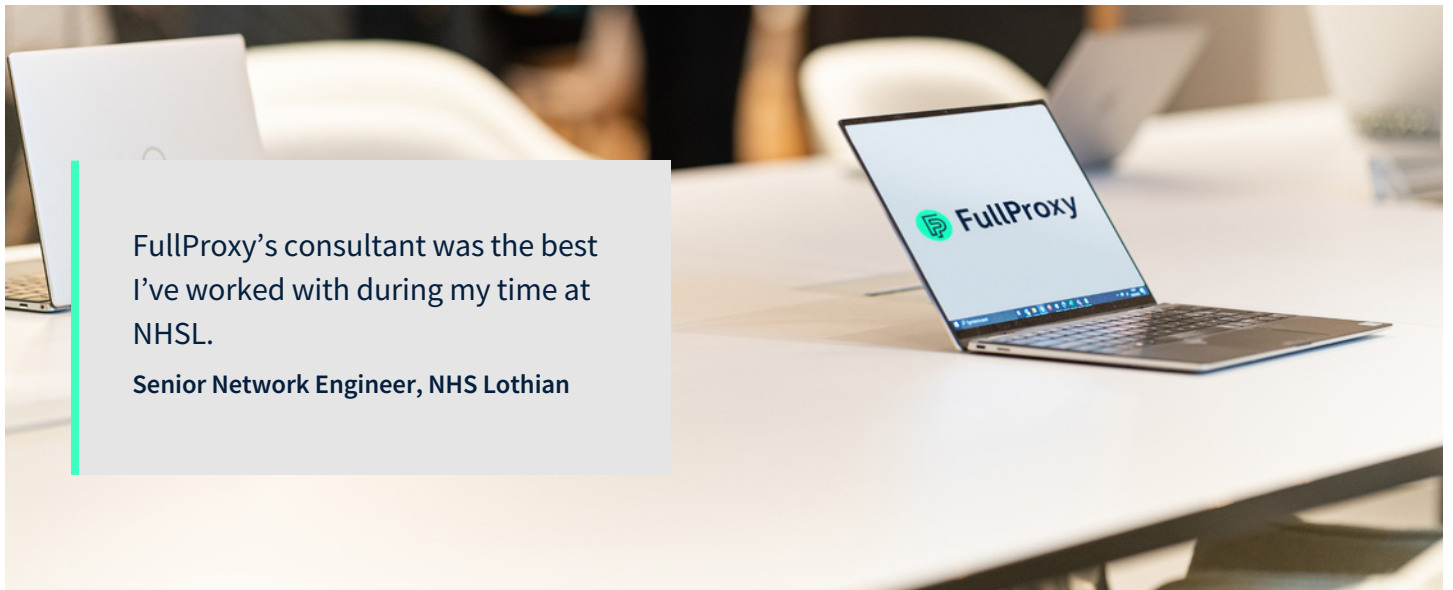

- Secure, application-level access without exposing the corporate network.
- Elimination of VPN and VDI-related attack surfaces.
- Reduced risk of lateral movement within the environment.
- Improved performance compared to legacy remote access solutions.
- Secure access for employees, contractors, and third parties.
- Support for hybrid and remote working models.
- Policy-driven access enforcement to support business continuity.

ZZPA (Zscaler Private Access) features:

- Cloud-native Zero Trust Network Access (ZTNA).
- Identity- and context-based access controls.
- AI-powered application segmentation.
- Inline inspection of private application traffic.
- Integrated Data Loss Prevention (DLP).
- Secure access from any device, anywhere.
- High availability and resilience for critical applications.
- Centralised visibility and management.

Your Cyber Security Specialists

FullProxy's consultant was the best I've worked with during my time at NHSL.

Senior Network Engineer, NHS Lothian

FullProxy are specialists in Cyber Security and Web Application consultancy. We optimise, install & manage premium cyber security solutions to minimise your security risk and maximise your return on investment.

Why work with FullProxy?

Our highly experienced consultants are Scotland's most certified F5 and Fortinet advisors, ensuring your implementation is seamless, your team is supported, and you achieve ROI from your implementation as soon as possible.

We also provide bespoke cyber security and web application strategy, with a curated portfolio of partner technologies to suit your needs.

FullProxy's size means we're agile and independent, so we can work alongside you to optimise the right solution for your organisation.

Our experience

Our extensive experience in delivering Public Sector projects means we have a deep understanding of your challenges and can therefore provide you with a better and more relevant service.

With a proven track record specifically in Healthcare, Education, Local Government, Financial Services and Critical Infrastructure we are trusted and recommended by people like you.

G-Cloud Service Directory

Infrastructure Software as-a-service
