Service Description: Data Migration

As public sector organisations embrace digital transformation advancements, maintaining business continuity is a crucial part of success. This is achieved by **Extracting** business data from legacy systems, **Transforming** it into its required specification and **Loading** it into the transformed organisation's operations.

Unlock Business Value with AI-Powered Data Migration (ETL)

Connect all your data on a single, AI-boosted, Microsoft platform, where applied transformation rules can surface immense business value from your data to fuel new technologies, ways of working and future-proof your organisation.

Improve data quality through curation and cleaning:

Ensure business confidence in your data integrity and reliability stays high and unify disparate data sources with Microsoft Azure.

Optimise Data for business consumption:

Utilise Data Factory to avoid manual, repetitive processing in modelling and preparing your data for end-users.

Streamline Complex Workflow Management:

Efficiently handle large volumes of data from diverse sources and manage dependencies by orchestrating and scheduling processes.

Features:

Full Data Migration Pipeline and consulting services	Secure Cloud Processesing
Extract, Transform & Load (ETL) process	Real-Time Data Visualization
Data Quality and Improvement	Data Security and Governance
Data Warehouse & Data Lake Design/Implementation	Proven Data Migration Tools and Methodologies with Bespoke Training

Benefits:

Improved Quality and Business Data Accuracy	Reduced Data Storage by using High-Performing Data Migration Tools
Automated and Repeatable ETL Processes	Accelerated Cloud Services Migration
Improved Data Visibility	Analytics & Insights
Increased Accountability for Migrated Data Sets	Secure SaaS Platform

How we plan the service

CloudSource provides a flexible and collaborative approach to Project and Programme planning for the implementation of new services, from blue-sky thinking and business case authoring through mobilisation, delivery, and continuous improvement.

We have a dedicated project management office that specialises in delivering Digital, Data, and Technology (DDaT) and has experience at all stages of the programme lifecycle, including supporting service development from pre-alpha onwards. Our methodology follows a proven, GDS-aligned process. It delivers Agile Scrum with overarching waterfall governance.

Throughout delivery, we collaborate with customers and partners in sprints, using a one-team, one-goal approach and a continuous delivery principle to deliver demonstrable benefits as early as possible in all our work. Project plans and milestones are aligned with deliverables, and Highlight Reports (HLR) are delivered at a frequency to provide a clear view of Project progress and activity status, leading to a high degree of confidence in achieving milestones.
