How we plan the service

CloudSource provides a flexible, collaborative approach to Project and Programme planning for the implementation of new services, from blue-sky thinking and business case authoring through mobilisation, delivery, and continuous improvement.

We have a dedicated project management office that specialises in delivering Digital, Data, and Technology (DDaT) and has experience at all stages of the programme lifecycle, including supporting service development from pre-alpha onwards. Our methodology follows a proven, GDS-aligned process. It delivers Agile Scrum with overarching waterfall governance.

Throughout delivery, we collaborate with customers and partners in sprints, using a one-team, one-goal approach and a continuous delivery principle to deliver demonstrable benefits as early as possible in all our work. Project plans and milestones are aligned with deliverables, and Highlight Reports (HLR) are delivered at a frequency to provide a clear view of Project progress and activity status, leading to a high degree of confidence in achieving milestones.
