1.1 Service Pricing

Tenable One licensing includes access to the following products:

- Exposure Management
- Attack Surface Management
- Cloud Security
- Identity Exposure
- Lumin
- OT Exposure
- Vulnerability Management
- Web App Scanning

Licensing for Tenable One is based on the number of assets configured within the various products, the unit of measure is referred to as a 'Tenable One Asset'. The quantity required is based upon how many assets (IPs, devices, resources, URLs) are being targeted in each product, each product has its own asset definition, and these definitions are used to calculate the total required.

A calculator and additional information is provided by Tenable to assist customers in understanding how many assets they need. Please see <https://docs.tenable.com/quick-reference/licensing-guide/Content/tenable-one-licensing.htm>.

Below is simple example for Vulnerability Management and ASM.

350 devices in Vulnerability Management = 350 Tenable One Assets

100 observable objects within ASM on a biweekly scan = 40 Tenable One Assets

The following table provides pricing information for license only and the manage services add-on charge. All prices are for a single Tenable One Asset per annum.

Pricing of the managed services is based on License Only + Managed Service Add-On x Tenable One Assets.

Tenable One Assets	License Only	Managed Service Add-On
300-1000	£40	£30
1001+	£35	£25

Assistance with the configuration and setup of the platform as part of a License Only services is available, charges are based on OGEL IT published rate card for professional services engagements.

All prices are excluding VAT.
