1 Service Description

A fractional integration service providing ongoing support for healthcare interoperability platforms and clinical data integration. Covers HL7, FHIR, and API-based integrations using leading healthcare integration engines and cloud integration services for NHS and public-sector organisations.

2 About Our Service

This service provides fractional access to experienced integration specialists supporting the configuration, monitoring, optimisation, and troubleshooting of healthcare integration platforms. It enables reliable data exchange between clinical systems while complementing existing in-house integration teams.

3 Service Features

- Fractional healthcare integration specialist support
- HL7, FHIR, and API integration services
- Mirth, Rhapsody, and Cloverleaf support
- InterSystems Ensemble and IRIS integration
- BizTalk Server healthcare integration
- Azure iPaaS integration services
- Interface monitoring and optimisation
- Integration incident response
- Testing and validation support
- Documentation and knowledge transfer

4 Service Benefits

- Reliable healthcare system interoperability
- Reduced integration operational risk
- Access specialist integration expertise
- Supports critical clinical data flows
- Faster resolution of integration issues
- Complements existing integration teams
- Scalable fractional support model
- Improved visibility of integration health
- Reduced reliance on single specialists
- Confidence in healthcare data integration
