1 Service Description

A specialist Azure Big Data service supporting the design, delivery, and optimisation of modern analytics platforms. Enables NHS and public-sector organisations to ingest, process, and analyse large-scale data securely and efficiently using cloud-native big data and analytics technologies.

2 About Our Service

This service provides expert support for Azure-based big data platforms, covering architecture, governance, performance, and cost optimisation. It enables organisations to build scalable, secure analytics environments supporting enterprise reporting, advanced analytics, and data-driven decision-making.

3 Service Features

- Azure Synapse architecture and solution design
- Azure Synapse – Enterprise data warehouse implementation
- Azure Synapse – Lakehouse analytics design
- Azure Synapse – Data ingestion and orchestration pipelines
- Azure Synapse – Azure Data Lake integration
- Azure Synapse – Dedicated and serverless SQL optimisation
- Azure Synapse – Power BI integration and optimisation
- Azure Synapse – Security and access control design
- Azure Synapse – Cost management and optimisation
- Azure Synapse – Platform documentation and handover

4 Service Benefits

- Azure Synapse – Scalable enterprise analytics platform
- Azure Synapse – Faster access to trusted analytical data
- Azure Synapse – Optimised query performance
- Azure Synapse – Reduced operational and cost risk
- Azure Synapse – Strong integration with Power BI
- Azure Synapse – Secure and governed analytics environment
- Azure Synapse – Supports structured and semi-structured data
- Azure Synapse – Accelerates analytics delivery
- Azure Synapse – Simplifies data warehouse modernisation
- Azure Synapse – Confidence in Synapse platform design
