1 Service Description

A fractional operations service providing ongoing support for Microsoft Fabric analytics platforms. Delivers proactive monitoring, optimisation, and operational assurance for Fabric environments without the need for full-time analytics platform specialists.

2 About Our Service

This service provides fractional access to experienced Fabric specialists supporting the day-to-day operation, governance, performance, and cost optimisation of Microsoft Fabric platforms. It ensures stability, reliability, and effective use of Fabric analytics capabilities.

3 Service Features

- Fractional Microsoft Fabric operational support
- Microsoft Fabric – Proactive platform monitoring and alerting
- Microsoft Fabric – Incident response and troubleshooting
- Microsoft Fabric – Performance and capacity optimisation
- Microsoft Fabric – Cost and consumption management
- Microsoft Fabric – Security and access governance
- Microsoft Fabric – Operational best-practice implementation
- Microsoft Fabric – Platform health and usage reporting
- Microsoft Fabric – Change and release support
- Microsoft Fabric – Knowledge transfer and documentation

4 Service Benefits

- Microsoft Fabric – Operational assurance without full-time staffing
- Microsoft Fabric – Predictable and transparent service costs
- Microsoft Fabric – Improved platform stability and performance
- Microsoft Fabric – Reduced analytics operational risk
- Microsoft Fabric – Optimised Fabric capacity consumption
- Microsoft Fabric – Access to specialist Fabric expertise
- Microsoft Fabric – Supports production analytics workloads
- Microsoft Fabric – Complements internal analytics teams
- Microsoft Fabric – Scalable fractional support model
- Microsoft Fabric – Confidence in Fabric platform operations
