1 Service Description

NCS-IT deliver Data Warehouse design, build and analytics consultancy services, combining enterprise Data Warehouse expertise with NHS analytics specialism to support secure, scalable reporting, operational insight and strategic analytics across public and private sector organisations.

2 About our service:

Our data warehouse service supports organisations with data integration, data strategy, and analytics platforms. We deliver solutions including Bedrock Data Warehouse, FDP-aligned architectures, Oracle GoldenGate, Mirth, Rhapsody, and Trust Integration Engines to enable Business Intelligence, Power BI, Qlik, and Tableau reporting.

3 Features

- Data Warehouse architecture design and build consultancy
- Cloud and hybrid Data Warehouse implementation services
- Data Warehouse integration from operational and transactional systems
- Data Warehouse analytics consultancy for reporting and insight
- Data Warehouse data modelling using industry best practices
- Data Warehouse NHS analytics and healthcare expertise available
- Data Warehouse data quality validation and reconciliation processes
- Data Warehouse performance optimisation for analytics workloads
- Data Warehouse security, access control and governance configuration
- Data Warehouse documentation, handover and ongoing support

4 Benefits

- Data Warehouse foundations enabling trusted enterprise analytics
- Data Warehouse improves decision-making using consistent data
- Data Warehouse delivery risk reduced through specialist consultancy
- Data Warehouse access to NHS and cross-sector expertise
- Data Warehouse enables faster operational and strategic insights
- Data Warehouse improves data quality across reports
- Data Warehouse platforms scalable for organisational growth
- Data Warehouse analytics aligned to governance requirements
- Data Warehouse reduces manual reporting effort
- Data Warehouse capability supported by specialist consultants
