We deliver **NHS Intelligent Automation & Robotic Process Automation (RPA)** for Trusts and ICSs. Our service designs, builds, and operates cloud-based Intelligent Automation & RPA, streamlining NHS processes across clinical and operational areas, including finance, RTT, and EPR administration, enabling staff to focus on higher-value work.

1 Features

- NHS Intelligent Automation & Robotic Process Automation (RPA) strategy development
- Identification of NHS processes suitable for Intelligent Automation & RPA
- Intelligent Automation & Robotic Process Automation (RPA) vendor selection
- NHS Intelligent Automation & Robotic Process Automation (RPA) pilot testing/analysis
- Cloud deployment of Intelligent Automation & Robotic Process Automation(RPA)
- NHS Intelligent Automation & Robotic Process Automation (RPA) business case development
- Intelligent Automation & Robotic Process Automation (RPA) training and capability enablement
- Business process redesign for Intelligent Automation & Robotic Process Automation (RPA)
- Alignment of NHS business data/technology teams for Robotic Process Automation (RPA)
- Change management for Intelligent Automation & Robotic Process Automation (RPA) adoption

2 Benefits

- Intelligent Automation & Robotic Process Automation (RPA) of NHS processes
- Increased efficiency through Intelligent Automation & Robotic Process Automation (RPA)
- Reduced NHS costs using Intelligent Automation & Robotic Process Automation (RPA)
- Fewer errors via Intelligent Automation & Robotic Process Automation (RPA)
- Rapid deployment of Intelligent Automation & Robotic Process Automation robots (RPA)
- High returns from low-investment Intelligent Automation & Robotic Process Automation (RPA)
- Improved staff experience through Intelligent Automation & Robotic Process Automation (RPA)
- Reduced administrative burden using Intelligent Automation & Robotic Process Automation (RPA)
- Improved accuracy across automated NHS workflows
- NHS staff focused on higher-value clinical and operational work
