1 Oracle Health (Cerner)

We deliver **NHS Oracle Health Millennium (Cerner) data, reporting, analytics, and data warehousing services** for Trusts and ICSs. Our specialists bring extensive **Oracle Health Millennium (Cerner)** knowledge, delivering end-to-end Millennium to NHS SQL warehouses, with real-time CDC, HL7/FHIR streaming, interface engine integration, RPA enablement, and **Microsoft Fabric** capability.

2 Features

- End-to-end Oracle Health Millennium (Cerner) to NHS SQL warehouse delivery
- Oracle Health Millennium expertise built from Cerner to Oracle years.
- Oracle Health CCL-based Millennium (Cerner) data extraction and transformation
- High-volume real-time Oracle Health Millennium (Cerner) clinical events and orders processing
- Oracle Health Change Data Capture pipelines for incremental Millennium (Cerner) updates
- Oracle Health HL7 v2 and FHIR R4 real-time data streaming
- Oracle Health Integration with NHS interface engines and messaging platforms
- RPA-enabled data triggers and downstream automation
- Microsoft Fabric Lakehouse and analytics implementation
- Oracle Health FDP-aligned data integration and federated reporting support

3 Benefits

- Proven Oracle Health Millennium (Cerner) real-time streaming expertise
- Strong Oracle Health HL7 FHIR interface engine integration capability
- Modern Microsoft Fabric analytics and lakehouse delivery
- Extensive long-term Oracle Health Millennium (Cerner) product knowledge
- Deep NHS experience across Oracle Health analytics and data warehousing
- Trusted NHS reporting aligned to Oracle Health operational requirements
- Reduced Oracle Health analytics delivery risk through NHS expertise
- Real-time Oracle Health feeds powering NHS command centre operations
