1 Service Description

A specialist data replication service delivering design, configuration, optimisation, and support for Oracle GoldenGate environments. Enables reliable, low-latency data replication across heterogeneous platforms for NHS and public-sector organisations.

2 About Our Service

This service provides expert Oracle GoldenGate support covering architecture design, replication configuration, monitoring, troubleshooting, and optimisation. It supports real-time and near-real-time data replication across on-premises and cloud environments.

3 Service Features

- Oracle GoldenGate architecture and design services
- GoldenGate extract and replicat configuration
- Real-time and near-real-time data replication
- Heterogeneous source and target support
- Replication monitoring and lag analysis
- Incident response and replication recovery
- Performance tuning and optimisation
- Upgrade and migration support
- Security and access configuration
- Documentation and knowledge transfer

4 Service Benefits

- Reliable low-latency data replication
- Improved data availability across platforms
- Reduced replication failure risk
- Faster resolution of replication issues
- Supports operational and analytical workloads
- Scalable replication for future growth
- Reduced dependency on vendor-led support
- Improved visibility of replication health
- Confidence in critical data movement
- Supports hybrid and cloud architectures
