1 Service: NHS Data and Analytics Cloud Support Services

We deliver **NHS data and analytics** cloud support for Trusts and ICSs. Our NHS data and analytics service assesses requirements, plans delivery, builds NHS data and analytics platforms, and manages NHS data and analytics infrastructure to agreed service levels, delivering measurable business value.

2 Features

- NHS data and analytics discovery aligned to clinical business objectives
- NHS data and analytics roadmap planning for value delivery
- Rapid delivery of NHS data and analytics to end users
- Managed NHS data and analytics services including licence optimisation
- Full NHS data and analytics coverage across Azure platforms
- Specialist NHS data and analytics expertise on Microsoft platforms
- NHS data and analytics delivery for NHS and government organisations
- NHS data and analytics warehouse build or migration to Azure
- NHS data and analytics using SQL Synapse Power BI ML
- NHS data and analytics modernisation and platform optimisation

3 Benefits

- Confidence selecting appropriate NHS data and analytics tooling
- Reduced risk NHS data and analytics delivery plans
- Sprint-based NHS data and analytics delivery of business value
- Managed NHS data and analytics frees internal capacity
- Enables NHS data and analytics transformation strategies
- Self-service NHS data and analytics and visualisation
- Years of deep NHS hospital data and strategy expertise
- NHS Data and Analytics deliver scalable support aligned to NHS operating models
- NHS Data and Analytics improve performance, resilience, and cloud cost efficiency
- NHS Data and Analytics enable compliant adoption of cloud-native NHS analytics
