1 Service Description

A specialist Azure Cloud Architecture service providing expert design and assurance for Azure environments. Supports NHS and public-sector organisations to design secure, resilient, scalable, and cost-effective Azure architectures aligned to organisational, technical, and governance requirements.

2 About Our Service

This service delivers senior Azure architecture expertise to support cloud strategy, platform design, and technical assurance. It covers Azure landing zones, networking, security, identity, resilience, and governance, helping organisations design Azure architectures that are fit for purpose, compliant, and sustainable.

3 Service Features

- Azure cloud architecture design and assurance
- Cloud architecture – Azure landing zone design and review
- Cloud architecture – Azure network and connectivity architecture
- Cloud architecture – Identity and access architecture using Entra ID
- Cloud architecture – Security and zero-trust architecture design
- Cloud architecture – High availability and disaster recovery architecture
- Cloud architecture – Azure governance and policy design
- Hybrid and multi-cloud architecture support
- Cloud architecture – Architecture reviews and technical assurance
- Cloud architecture – Architecture documentation and knowledge transfer

4 Service Benefits

- Secure and resilient Azure cloud architectures
- Cloud architecture – Reduced risk in Azure platform design
- Cloud architecture – Architectures aligned to public-sector governance
- Cloud architecture – Improved scalability and reliability
- Cloud architecture – Optimised Azure cost and resource usage
- Cloud architecture – Clear architectural standards and patterns
- Cloud architecture – Supports cloud adoption and transformation
- Cloud architecture – Independent technical assurance and oversight
- Cloud architecture – Improved confidence in Azure design decisions
- Cloud architecture – Future-proof Azure platform architectures
