1 Service Description

A managed and fractional SQL Server DBA service delivering proactive monitoring, maintenance, incident response, performance optimisation, and security assurance. Designed for NHS and public-sector organisations requiring reliable SQL Server DBA services without full-time Database Administrator resources.

2 About Our Service

This service provides ongoing SQL Server DBA support using automation and senior Database Administrator oversight. It supports on-premises and cloud SQL Server estates, offering SLA-backed DBA services, predictable costs, and scalable capacity aligned to public-sector operational requirements.

3 Service Features

- Fractional SQL Server DBA operational support
- Proactive monitoring and DBA alerting
- SLA-backed DBA incident response
- Backup verification and recovery assurance
- SQL Server performance tuning
- Index, integrity, and statistics maintenance
- Security and access control reviews
- Always On and replication monitoring
- Capacity planning and forecasting
- Monthly and quarterly DBA reporting

4 Service Benefits

- Continuous DBA coverage without full-time staffing
- Predictable monthly DBA service costs
- Access to senior SQL Server DBA expertise
- Reduced downtime and operational risk
- Improved SQL Server performance
- Greater visibility of database health
- Supports hybrid and cloud estates
- Scales DBA capacity on demand
- Improved governance and compliance
- Peace of mind for critical databases
