1 Service Description

We deliver NHS Command & Control Centre for Trusts and ICSs. Our specialists design and deploy Command & Control Centres for vital areas such as ED, capacity, bed management, patient flow and client-defined KPIs, using Microsoft Fabric Real-Time Analytics with Oracle Health Millennium (Cerner), HL7/FHIR, CDC feeds, and optional ICS-wide coordination.

2 Features

- NHS Command & Control Centre design deployment and support services
- Client-defined KPIs aligned to NHS operational priorities
- Optional ICS-wide multi-Trust NHS Command & Control Centre coordination
- Real-time NHS Command & Control Centre feeds from Millennium HL7 FHIR CDC
- NHS Command & Control Centre monitoring for UEC SDEC ECDS RTT
- Ambulance handover and bed management Command & Control Centre dashboards
- Single-pane NHS Command & Control Centre operational visualisations
- Automated workflows configured for Command & Control Centre escalation
- Microsoft Fabric Real-Time Analytics for NHS Command & Control Centres

3 Benefits

- Single pane of glass across NHS Command & Control Centres
- KPIs reflecting local NHS priorities and performance measures
- Improved UEC SDEC and patient flow visibility
- Faster decisions through NHS Command & Control Centre insights
- Reduced ambulance handover delays using real-time analytics
- Organisation-wide situational awareness via Command & Control Centres
- Improved coordination across Trust and ICS services
