PUBLIC

About PUBLIC

Our Mission | Why do we exist?

PUBLIC is a **digital transformation partner committed to helping the public sector turn innovative ideas into practical solutions.**

Our mission is to **help the public sector deliver outstanding, digitally-enabled services for citizens.**

We exist to help build a public sector that:

- Leverages **new technology to deliver better societal outcomes**
- Activates an **empowered, digitally-equipped workforce**
- Thrives on its own as an **innovation powerhouse** in its own right

Our Approach | The transformation life cycle

We categorise the **digital transformation life cycle** into four distinct stages and we work with our clients to provide them with the specialist support, expertise and solutions they need at each stage.

This allows us to get our clients from **'What problems do we have?'** ...

...all the way to **'We have the technology, skills and organisational approach to solve existing and emerging problems in innovative ways'.**

Our Expertise | Where do we focus our work?

Our 6 Areas of Expertise built by deep experience, proprietary methodologies and proven success

Local Government

Cloud Security Assessment

Cloud Security Assessment

Why: Cloud environments are complex and fast-moving. Without visibility, you're flying blind. Cloud providers give you the tools — but you are responsible for configuring them securely. A single misstep can expose your entire environment. Our Cloud Security Assessment provides you with a comprehensive health check for your digital infrastructure and a systematic review designed to identify vulnerabilities, misconfigurations, and compliance gaps within your cloud environments.

How: Security verification to guarantee operational security of your cloud environment. Assessment is done at the platform level to verify that architectural, network and database controls are in place. As an outcome, we will provide prioritised and categorised report and findings for all your workloads with actionable recommendations. Our assessment will include:

- Technical verification of the cloud environment
- Architecture and configuration review
- Identity and access management review
- Data encryption review
- Network segmentation and access control

Potential Customers: Ideal clients include central government and public sector organisations that are setting or refining their cloud security environment.

Cloud Security Assessment

Features

- Comprehensive health check for your digital infrastructure
- Technical verification of the cloud environment
- Architecture and configuration review
- Identity and access management review
- Data encryption review
- Network segmentation and access control

Benefits

- Experienced and certified security specialists
- Provides a clear picture of your assets, risks, and priorities
- Personalised operational security of your cloud environment verification
