PUBLIC

About PUBLIC

Our Mission | Why do we exist?

PUBLIC is a **digital transformation partner committed to helping the public sector turn innovative ideas into practical solutions.**

Our mission is to **help the public sector deliver outstanding, digitally-enabled services for citizens.**

We exist to help build a public sector that:

- Leverages **new technology to deliver better societal outcomes**
- Activates an **empowered, digitally-equipped workforce**
- Thrives on its own as an **innovation powerhouse** in its own right

Our Approach | The transformation life cycle

We categorise the **digital transformation life cycle** into four distinct stages and we work with our clients to provide them with the specialist support, expertise and solutions they need at each stage.

This allows us to get our clients from **'What problems do we have?'** ...

...all the way to **'We have the technology, skills and organisational approach to solve existing and emerging problems in innovative ways'.**

Our Expertise | Where do we focus our work?

Our 6 Areas of Expertise built by deep experience, proprietary methodologies and proven success

Local Government

Platform Engineering

Value Assessment

Platform Engineering Value Assessment

Why: The platform engineering model combines automation, reusable components and standardised practices to reduce complexity and enable high-quality, secure delivery at scale. Assessing and redefining an organisations model can empower developers to move faster, safe and with less friction.

How: We will work in collaboration with you to review, analyse and discuss the existing infrastructure, tooling, and workflows and perform a current state gap analysis to your organisation to help you understand your organisation's maturity. We will analyse your organisation's strengths and limitations and defines the key focus areas. Based on the focus areas, we will calculate an intuitive maturity assessment and Platform Engineering ROI estimate, aligning technical goals with business value to justify stakeholder commitment and investment in Platform Engineering model adoption

Potential Customers: Ideal clients include central government and public sector organisations that are setting or refining their platform engineering model.

Platform Engineering Value Assessment

Features

- Understand clearly your organisation's Platform Engineering maturity
- Identify intuitively the Platform Engineering value and ROI
- Review and analyse the existing infrastructure, tooling and workflows
- Examine relevant architectural diagrams, process documentation, and technical materials

Benefits

- Data-driven justification for strategic investment in Platform Engineering
- Bridge the gap between technology and business to ensure tangible outcomes
- Unlock the full potential of Platform Engineering, delivering measurable results
- Secure, audit-ready environments by default
- Less duplication and fewer manual tasks
