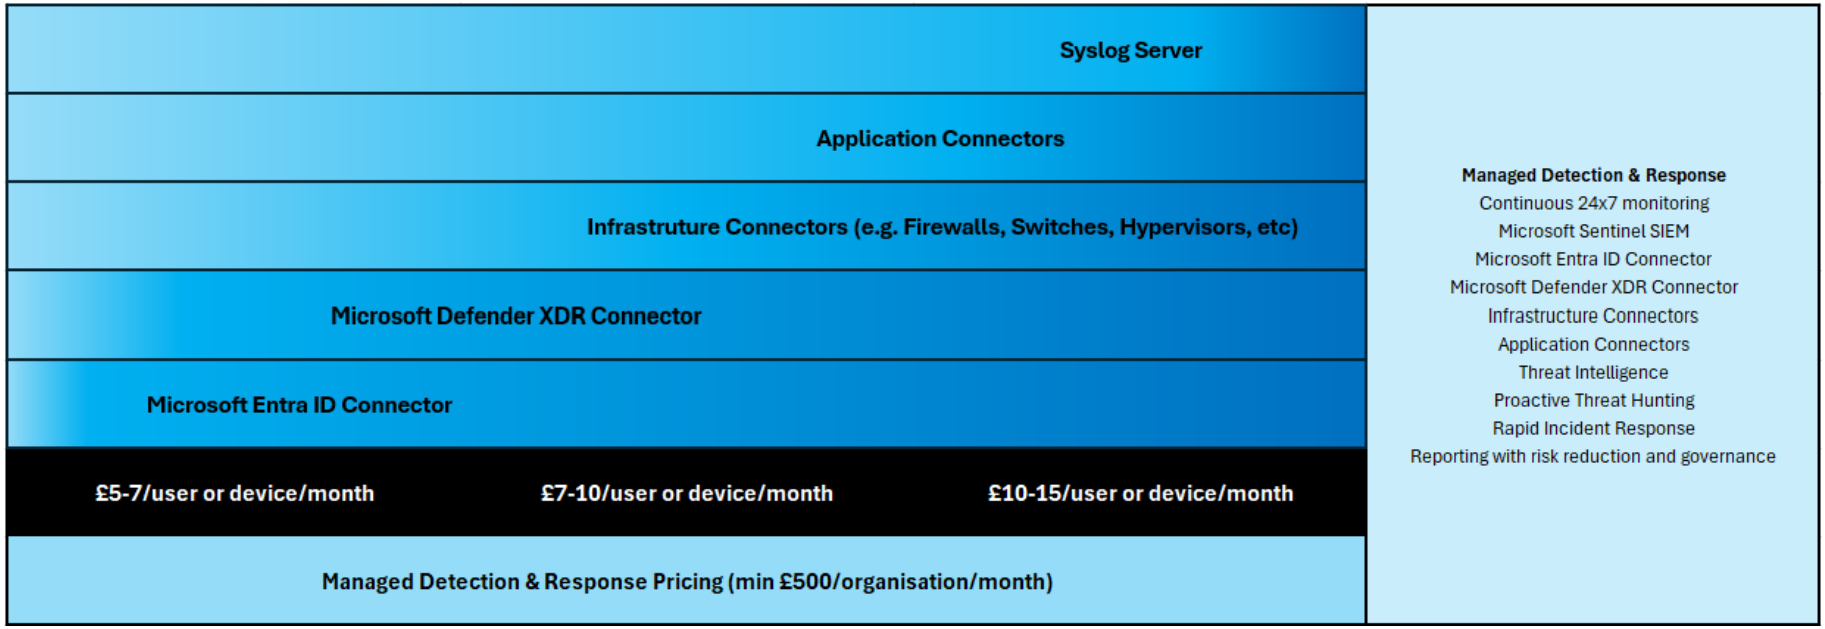
Managed Detection and Response

The service is priced on a **per user or device per month basis**. There is a minimum monthly cost per organisation of £500. The per-user price is based on the below guide depending on the number of connectors required and will be agreed following a scoping call.



Support

There are 3 support tiers. Standard support is included in the per user or device price per month. Enhanced and Premium support are priced based on an uplift to the per user or device fee.

Standard Support (Included)	Enhanced Support (£3-5/user or device/month)	Premium Support (£5-10/user or device/month)	
Standard Support includes the following: 24x7 access to our UK-based SOC team via phone, email, and secure portal. Incident triage Investigation Remediation guidance Automated reporting	**Enhanced Support includes Standard Support plus the following:** Proactive service reviews Tailored reporting Quarterly Threat Posture Assessment (a structured review of your security posture, including threat intelligence analysis, SOC data trends, risk scoring, and actionable recommendations to strengthen defences and meet compliance, with an executive summary for leadership).	**Premium Support includes Enhanced Support plus the following:** Dedicated Technical Account Manager (TAM) for strategic guidance, escalation management Priority access to senior analysts.	**Onboarding** Risk Assessment Identification of VIP's (people and assets) Setup of Sentinel and Lighthouse Connectors for Entra ID and Endpoint XDR Connectors for Infrastructure and Applications Syslog Server (if specified) Setup of Tailored Reporting (if specified) **Service Managament** Review of Risks, Vulnerabilities and Incidents Review of Risk Assessment Review of VIP Lists Review of Threat Intelligence Review of Tailored Reports (if specified)
Managed Detection & Response Support Levels and Pricing			

Azure Hosting

Sentinel log consumption is billed directly through your Azure subscription.

We can connect securely to your existing Sentinel via Lighthouse, or we can host Sentinel logs separately within a dedicated tenancy.

Price Flexibility

D2NA allows customer numbers and assets to flex up or down by up to 10% annually without pricing change. This enables predictable budgeting and ensures the service meets the operational and strategic needs of UK public-sector organisations.

This structure provides clarity, predictability, and flexibility, ensuring the service meets the operational and strategic needs of UK public-sector organisations.

Complimentary Services

In addition to the core Managed Detection and Response (MDR) service, our SOC also offers the following complimentary services to further strengthen your security posture. Each of these is priced separately. Please contact D2NA to arrange a scoping call, following which we will provide accurate pricing for your needs for each of these complimentary services. Wherever appropriate the per user per month pricing model will be used.

- ✓ Vulnerability Management
- ✓ Endpoint Patching
- ✓ Infrastructure Patching
- ✓ Governance, Risk & Compliance
- ✓ Phishing Testing & User Awareness Training (D2Aware)
- ✓ Virtual Chief Information Security Officer (CISO)
