G-CLOUD SERVICE DESCRIPTION

Volt4 Collaborator (Lot 2b)

Service Description Volt4 Collaborator enables secure, cross-organisational teamwork between people and AI agents. Integrating encrypted messaging, email interfaces, and project management, it ensures total resilience via offline synchronisation. This decentralised platform supports virtual events and enterprise communities with zero-trust security, preserving data sovereignty while facilitating seamless, real-time collaboration across boundaries,,,,.

Features

- **Secure Messaging:** End-to-end encrypted messaging for individuals and groups,.
- **AI Teaming:** Seamless workflow integration between humans and AI agents,.
- **Offline Synchronisation:** Full local sync ensures resilience during network outages,.
- **Email Integration:** Includes email interface for legacy system compatibility,.
- **Cross-Organisational:** Distributed architecture enables secure sharing between organisations,.

Benefits

- **Total Resilience:** Continues operating fully even when offline,.
- **Enhanced Security:** Zero-trust model protects data across all interactions,.
- **Productivity:** AI agents automate tasks within collaborative workflows,.
- **Data Sovereignty:** Users retain complete control over shared data,.
- **Cost Efficiency:** Low ownership costs compared to traditional SaaS,.
