Pricing

Introduction

Pricing for Neos Networks SD-WAN services are 'price on application' (PoA).

Whilst there are standard components, a WAN is a tailored solution for each customer, with a number of variables and options that will affect pricing.

The following section gives potential customers a breakdown of potential components, as well as notes regarding pricing.

Pricing Components

Component	Pricing	Options and Notes
Customer Premises Equipment (CPE) and software licencing	From c. £600	Our SD-WAN is based upon equipment and software supplied by Silver Peak. There are multiple CPE options which will be enable us to tailor a solution based on the data usage at the site, connectivity option chosen, functionality required as well as anticipated growth during the contract term. Options: Customer may opt to purchase and own the equipment up-front or to lease the CPE, enabling a fixed cost monthly price over the term of the contract. Customers can choose contract lengths from 12 months to 5 years.
Connectivity	PoA	Connectivity prices will vary based on a number of variables or options selected, for example: • Connectivity type • Site location • Bandwidth required • IP Addresses required Note: Neos Networks has an online quoting tool available for connectivity.
Orchestration and Management	PoA	Includes hosting of an orchestrator at a data centre as well as reporting and management of the overall service, as well as CPE break fix to the SLAs stated.
Installation and Project Management	PoA	Quoted based on the number of sites, locations, connections required and complexity.

About Neos Networks

Neos Networks has the UK's largest business-dedicated network. With over 600 points of presence and 90 data centres nationwide, Neos provides high capacity critical connectivity for businesses, from telecoms and energy to banking and emergency services.

Agile and customer-focused with almost limitless scale, Neos enables emerging technologies like AI, 5G and IoT, making connectivity work for Britain.
