- Holistic view of risks and interdependencies

About Hand & Millar

Hand & Millar Management Consulting is a dynamic and energetic enterprise committed to delivering high-quality management consulting services across both public and private sectors. With a strong foundation in integrity, loyalty, and partnership, we are dedicated to helping clients achieve their strategic goals through tailored solutions and expert guidance.

By ensuring we put our clients' needs at the heart of everything we do, our experienced and empathetic consultants provide proportionate, tailored and implementable project delivery capabilities into client teams to help their organisation succeed.

Our purpose

Our purpose is to create the best possible future for the individuals, teams and organisations we work with through the broad range of services that we offer public sector organisations.

Hand and Millar Management Consulting believes in doing things differently by seeing things differently. We tailor our approach and methodologies to meet the specific needs of each client, ensuring practical, results-driven solutions that foster long-term success.

Our core values

We care passionately about delivering value into the public sector. This is because we are consumers of many public sector services ourselves, but also because that is where we have come from. Our Partners have both worked within the Civil Service, as have many of our employees and associates. Our 3 core values reflect this dedication and experience:

Listening as Leadership: We make space for voices to be heard, perspectives to be shared, and meaning to be discovered.

Trust through Empathy: We seek first to understand not just what's said, but what's felt. We approach every challenge with a genuine desire to uncover what matters most to people.

Presence with Purpose: We're fully engaged with our clients and each other. Whether in a moment of challenge or clarity, we remain attentive and guided by the "why."
