

Transformation recovery and acceleration

Lot 3: Cloud Support

Features

- Stabilise and turn around failing or delayed transformation projects, programmes
- Recover slippage in schedule, budget and/or quality
- Accelerate delivery of existing cloud adoption projects and programmes
- Comprehensive review of scope, approach, architecture, delivery and financials
- Clear definition of roadmap and outcomes to support your vision
- Senior stakeholder engagement and alignment
- Agile methodologies used for delivery at pace
- Highly experienced product management and delivery management
- Alignment with PMO and portfolio-level roadmaps
- Accelerates adoption of cloud architecture and services

Benefits

- Access to extensive public sector experience, case studies and knowledge
- Rapidly enhances your in-house capability
- Comprehensive independent programme review
- Prioritises quick wins and high-gain transformation activities
- Accelerates reduced-risk adoption of cloud technologies and their benefits
- Overcomes obstacles and removes blockers
- Embeds robust and sustainable ways of working and delivery cadence
- Quickly embeds cost reduction and efficiency improvements, maximising return on investment (ROI)
- Best practice implementation of the HMG Technology Code of Practice
- Alignment to HMG DDaT Playbook, Secure by Design principles, and NCSC security guidance

About Hand & Millar

Hand & Millar Management Consulting is a dynamic and energetic enterprise committed to delivering high-quality management consulting services across both public and private sectors. With a strong foundation in integrity, loyalty, and partnership, we are dedicated to helping clients achieve their strategic goals through tailored solutions and expert guidance.

By ensuring we put our clients' needs at the heart of everything we do, our experienced and empathetic consultants provide proportionate, tailored and implementable project delivery capabilities into client teams to help their organisation succeed.

Our purpose

Our purpose is to create the best possible future for the individuals, teams and organisations we work with through the broad range of services that we offer public sector organisations.

Hand and Millar Management Consulting believes in doing things differently by seeing things differently. We tailor our approach and methodologies to meet the specific needs of each client, ensuring practical, results-driven solutions that foster long-term success.

Our core values

We care passionately about delivering value into the public sector. This is because we are consumers of many public sector services ourselves, but also because that is where we have come from. Our Partners have both worked within the Civil Service, as have many of our employees and associates. Our 3 core values reflect this dedication and experience:

Listening as Leadership: We make space for voices to be heard, perspectives to be shared, and meaning to be discovered.

Trust through Empathy: We seek first to understand not just what's said, but what's felt. We approach every challenge with a genuine desire to uncover what matters most to people.

Presence with Purpose: We're fully engaged with our clients and each other. Whether in a moment of challenge or clarity, we remain attentive and guided by the "why."
